igion Post Service KOREM. Ethiopia - A year ago stretchers were dispatched every morning in this famine camp to collect bodies. They were brought to the morgue tent, washed, and wrapped in shrouds fashioned from food-

Outside the morgue, mothers, sisters and wives sat in the dirt morning after morning and wept.

Last week the morgue was empty. Scores of stretchers, which once had borne as many as 100 corpses a day, lay on the floor of the morgue, gathering dust. Just outside, fat-cheeked children played and sang. joyfully oblivious to the past.

The one-year transformation of Korem from a burgeoning famine camp where doctors felt helpless to a shrinking feeding center where doctors are bored is testament to a worldwide relief operation that in the past year has defanged, if not defeated, Ethiopia's great famine.

A year ago, relief food reached only one out of 10 of the 7.9 million Ethiopians threatened by starvation, according to United Nations figures.

Fred C. Fischer, U.S. coordinator of emergency relief in Ethiopia, said, "What we have done is save the lives of most of the 7.9 million who were at risk. Some have died, but it is in the hundreds of thousands, not the millions. It is one of the world's great success stories." Mr. Fischer was speaking of the combined

programs."

year, the changes wrought in 12 months were astounding. In the camp's four hospital sheds, Ethiopians last

year slept six or seven to a bed, shivering in rags in the highland cold. In those sheds jast week, they slept one or two to a bed, wrapped in thick wool blankets. The cholera isolation ward where 228 people died in

A New Trojan Theory Launches a Thousand Yugoslav Dreams

GABELA, Yugoslavia - None of the evidence is in yet, but the people of this village about 15 miles inland from the Dalmatian coast have begun to act as though they are sitting on the cradle of Western civilization. A steady flow of tourists from many countries strength-

ens them in their belief. It all began last summer, when news reached here from Mexico that a scholar had published a theory that ancient Troy was not where Heinrich Schliemann excavated it more than a century ago in Asia Minor,

on the western coast of Turkey, but in Dalmatia. The Mexican, Roberto Salinas Price, said his read-

ing of Homer's "Iliad" left room for no other conclusion but that Gabela had been Troy.

Because the "Iliad" is the wellspring of Greek history and that, in turn, the bedrock of classical culture, Mr. Salinas Price's displacement of Troy from Asia Minor to Dalmatia would make modern Yugoslavia the fountainhead of Western civilization. The Yugoslav press seized on the theory with ardor. Not surpris-

ingly, the Greek press has paid no attention.

Mr. Salinas Price published his book in English at Scylax Press in San Antonio, Texas. When a correspondent of Tanjug, the Yugoslav news agency, sent a dispatch, it was so inundated with requests for special articles that it took the unusual step of publishing in hard cover both the original book and a Serbo-Croatian translation. They are selling well at about \$7 a

Mr. Salinas Price, for whom Homer is said to be a lifelong passion, based his theory on what he considers

geographical and astronomical anomalies in the "Ili-ad" that preclude an Asia Minor Troy. After years of research, which first brought him to Yugoslavia in 1967, he concluded that Gabela was the only possible

He theorized that the reason for the millennia-old geographical error was political. In the seventh centuy B.C., Mr. Salinas Price suggests, Greeks cleverly transferred all the place names in the "Iliad" to territories that were then Greek. Homer lived in the eighth century B.C.

Yugoslav archeologists gave the theory short shrift. proclaiming to a man and woman that no archeological evidence has ever been unearthed to buttress the

'We don't care what the archeologists say," said Dragan Bradvica of the Gabela Tourist Association, which was quickly formed and gave the unemployed Mr. Bradvica a job. "We are very enthusiastic here and are ready to dig on our own."

As soon as the first tourists showed up last summer, the farmers of Gabela knew they had a good thing. They inspired local youths with visions of tourist bounty and set them to clearing one of the village's three hills, which is crowned by remnants of Roman, Venetian, Turkish and Bosnian fortifications and shrines. About 100 boys and girls gave up their spare time for weeks to make accessible a badly overgrown

The tourist association does not actually pretend that the site is the Troy of old, but it does nothing to "We believe!!!" indicates the thought has taken hold.
At the moment, the association occupies only the apartment at the back of a schoolhouse that until recently was occupied by the teacher. But before the next tourist season starts, the whole school will be moved to make way for what the 2,300 villagers hope vill be the beginning of Troy-Gabela's golden age.

Already, the enterprising private sector of this Communist country has produced an ample range of souvenir articles - Troy ceramics, maps, car stickers, sun visors, model ships and little lions of Troy. The ruins of an Ottoman mosque have been turned

into a mini-amphitheater, where classical Greek and modern Yugoslav folklore performances will entertain next summer's visitors. It was inaugurated on the new Troy's greatest day so far -a triumphant visit by Mr. Salinas Price in September.

ers and hundreds of outsiders. "People wanted to thank him for bringing back fame to Gabela." Mr. Bradvica said, emphasizing "back." After the welcoming ceremony of bread and salt and a traditional regional dance luckily but inexplicably called the Trojan, the father of the village's fame

According to Mr. Bradvica, the scholar was moved by the enthusiasm and clearly aware of his responsibility. "If they can prove I'm wrong," the tourist official quoted Mr. Salinas Price as saying, "I'll commit

barred Australia on Friday from using a U.S.-maintained military base here to protest what it termed an "insult" to President Ferdinand E. Marcos by the Australian foreign minister, Bill Hayden.

"The Philippine government is withdrawing its authority to allow Australian aircraft to land or use the Clark Air Base for any purpose whatsoever," the Foreign Ministry

Mr. Hayden told the Australian Parliament on Tuesday that there were "human rights abuses by some organs of the government" in the Philippines and that there was extensive economic injustice resulting from the government's resolute inaction against the privileges and political power of its wealthy oligarchic patrons."

The situation, he said, had "provided fertile ground for the growth" of a Communist rebellion in the Philippines.

In a letter to the Australian Embassy, the Foreign Ministry said it was "surprised why it was necessary for the foreign minister of Australia to insult and attack viciously the head of state and government of the Republic of the

U.S. Rightists Scorn Talks, Soviet Asserts

MOSCOW - Pravda, the Soviet in the United States on Friday, estants "a coming together in the results of the Geneva summit

meeting and resist an arms accord. An article assessing American reaction to the meeting between President Ronald Reagan and the Soviet leader, Mikhail S. Gorbachev, said most U.S. news analysts agreed the summit meeting had provided a basis for improving U.S.-Soviet relations.

Pravda said U.S. commentators believed it was important that the two countries had agreed that neither side would win a nuclear war and that neither sought military superiority over the other.

"This does not mean that there is nobody in the United States today who is displeased with the results of the Geneva meeting," Pravda added. "The forces of the military-industrial complex and political reaction would already like to emasculate the content of the Geneva decisions and to do all they can to hold back progress on reaching accords on key issues of war and peace."

Pravda also said it was curious that the summit meeting was no longer discussed prominently in the American media

"One cannot help noticing the fact that, as if at the wave of a baton by an invisible conductor, the U.S. mass media have begun these days to curtail discussion of the results of the U.S.-Soviet summit," Pravda said.

"Someone is clearly seeking to localize the effect of Geneva, to slow down the positive process and to weaken the powerful impulse which the summit gave to this process," the newspaper said.

> The Associated Press VATICAN CITY - Bishops and archbishops from three countries have suggested that steps be studied to allow Catholics who have divorced and remarried to again receive Holy Communion.

At least 165 members of the hierarchy from around the world are attending a two-week, extraordinary synod here of the Roman Catholic Church, which opened Monday, to assess the effect of the reforms of the Second Vatican Council, held from 1962 to 1965.

Bishops from Austria and Japan suggested Wednesday that divorced and remarried Catholies be allowed to participate fully in the church. On Thursday, a Canadian agreed.

"I feel a tremendous sympathy for persons in that situation and I would certainly like to be able to reach out to them and come to their aid," said Archbishop James Martin Hayes of Halifax, vice president of the Canadian

bishops' conference. In a closing session of a synod on the family in 1980, Pope John Paul II said divorced Catholics who remarried outside the church "can and ought to participate in the life" of the church, but could not receive the Holv Eucharist unless they abstained from sexual relations.

cocaine powder is processed into pure beige crystals known

By Jane Gross New York Times Service

NEW YORK - A new form of cocaine is for sale on the streets of New York, alarming law enforcement officials and rehabilitation experts because of its tendency to accelerate abuse of the drug, particularly among adolescents.

The substance, known as crack, is already processed into the purified form that enables cocaine users to smoke, or freebase, the powerful central nervous system stimulant. Previously, freebasers had to reduce cocaine powder themselves to its unadulterated form by combining it with baking soda or ether and evaporating the resulting paste over

Since crack appeared on the streets of the Bronx last year. spreading throughout the city and its suburbs, new cocaine

users have graduated more quickly from inhaling to freebas-ing, the most addictive form of cocaine abuse. In addition, crack dealers have found a ready market in people reluctant to escalate to intravenous injection of cocaine because of the fear of acquired immune deficiency

"Drug abusers are always looking for the ultimate high, asking each other, 'Did you try this, did you try that?' " said William Hopkins, who directs the street research unit of the state Division of Substance Abuse Services. "This, I have every reason to believe, is building. This is the wave of the

Widespread use of crack has not been reported outside the New York area. But Dr. Arnold M. Washton, who is director of addiction research and treatment at Regent Hospital in Manhartan and research director for a national telephone "hot line" for cocaine users, predicts an "epidemic" of freebasing because of the availability of crack.

As the use of crack has spread in the metropolitan area, drug officials have begun raiding "factories" where the

as "rocks" and then packed into transparent vials resembling large vitamin capsules

The crack sold on the street in New York ranges in cost from \$2 to \$50 depending on the number of rocks in the vial

Because of crack, new cocaine users have graduated more quickly from inhaling to freebasing, the most addictive form of cocaine abuse.

and, paradoxically, is sometimes less expensive than the amount of powder, currently retailing at \$75 to \$100 a gram, necessary to produce the equivalent freebase.

Meanwhile, narcotics officers from the New York City

Police Department have shut a few of the so-called crack houses, where sales are made and users gather for smoking binges that can last for several days. Earlier this month, agents of the federal Drug Enforce-

ment Administration arrested a cocaine dealer and then raided a Harlem apartment where he was reputedly producing a kilogram (2.2 pounds) of crack each day, for net daily profits of \$500,000. While law enforcement officials are increasingly turning

their attention to crack, its abusers are showing up in local treatment centers, where cocaine-related admissions were rising dramatically even before the new form of the drug was

Experts estimate there are at least five million regular cocaine users in the United States, with perhaps a million of them in the New York metropolitan area.

According to data collected through the telephone hot line, 60 percent of the users snort the drug, with the remaining 40 percent evenly divided between freebasing and intravenous use. The pattern, however, seems to be changing,

Of the three methods of use, freebasing offers the most immediate high (within 10 seconds) and the shortest one (approximately 5 minutes) and thus leads to the most frequent, debilitating and costly habit, experts say.

Kevin McEneaney, director of clinical services at Phoenix House, an international network of rehabilitative centers, said he was concerned by reports of sexual degradation from women using crack,

Cocaine, particularly in its freebase form, is a euphoriant and its users often describe increased sexual appetite and an interest in previously untried sexual practices. Mr. McEneancy said.

Finally, Mr. McEneaney said, there is the risk of unpredictable medical complications. By stimulating the central nervous system, increasing heart and respiration rates and elevating blood pressure and body temperature, cocame has been known to cause coronary arrest, strokes, convulsive seizures and other less serious disorders.

Medical experts and law enforcement officials agree that crack should not be considered merely a slight variation of the cocaine that is snorted because freebasing is such a different experience, both qualitatively and quantitatively.

The high these people describe is not even comparable," said Dr. Washton of Regent Hospital. "It is unmatched in its euphoria and exhilaration. Clinicians need to know about it. Parents need to know about it. Law enforcement people in other parts of the country need to know about it. In no way should it be compared to snorting cocaine hydrochloride powder. It's almost like we're talking about a different drug

In Test on Rats, Artificial Blood Cells Succeed in Sustaining Life

By Boyce Rensberger

Washington Past Service
WASHINGTON — Medical researchers in San Francisco have made artificial red blood cells and then used them, in salt water, to replace half the blood in rats.

The animals, which ordinarily would have died from such a blood loss, survived with only minimal side effects, showing that the artificial cells were able to pick up oxy-gen in the lungs and deliver it to the

rest of the body.

The feat, believed to be the first of its kind, shows that it may be possible to develop a new kind of blood substitute that doctors could use in emergencies to treat human victims of massive blood loss. The artificial cells contain hemoglobin removed from whole stored blood ings in the issue of the journal Scithat no longer was safe to use.

The scientists who made the artificial cells emphasize that their de- in recent years most attention has velopment is only an experimental focused on a synthetic oil called prototype and that it will be several perfluorocarbon. Journal's Apology Troubles the Press Action in Singapore Contrasts U.S. and Foreign Standards

By Alex S. Jones New York Times Service

NEW YORK -A recent apology to a Singapore court by the edi-tor of The Asian Wall Street Journal for an editorial has raised some troubling journalistic questions, according to journalism and rights

In particular, the apology has touched off discussion on the appropriate response when a foreign court challenges the editorial freedom of an American news organization publishing abroad. It has also focused scrutiny on the degree

of press freedom in Singapore. On Nov. 19, Fred Zimmerman. editor and publisher of The Asian Wall Street Journal, apologized to the high court in Singapore for any contempt of court caused by an editorial that appeared Oct. 17. The apology was made at a hearing on contempt charges, prompted by the editorial, against The Asian Wall

Street Journal and several other parties. The case is still pending.
The disputed editorial described what many Singaporeans believe is official harassment" of opposition political figures, and particularly examined a series of court for Dow Jones & Co., the parent Jeyaretnam, the first opposition politician to be elected to Singa-

he were, many Singaporeans wouldn't believe it because court actions, and especially libel suits, have long been used in Singapore as we consider it unwarranted. Say we consider it unwarranted. Say we consider it unwarranted. Say we consider it unwarranted. nam is guilty," it said, "but even if

pore's Parliament.

Several spokesman for journalism and human rights groups have speculated that the apology may have stemmed from a combination of economic concern for preserving the Journal's printing and distribution system in Singapore and editorial concern for preserving editorial access to Singapore, both of which might have been in jeopardy.

But the apology may have sent "a dangerous message" that could damage efforts by news organizations to fight curbs on press free-dom, said Felice D. Gaer, executive director of the International Street Journal and The Asian Wall eague for Human Rights. Dana Bullen, executive director

of the World Press Freedom Committee, said: "In Asia, an apology goes a long way to square things. But I'd say that apologizing for doing the job that journalists are supposed to do certainly would be an unfortunate precedent, and I hope this does not mean that newspapers will tailor news coverage or editorial comment in this area."

Leonard R. Sussman, executive director of Freedom House, a rights organization in New York, said: "It's a hard call, and it points up two sets of standards, one that The Wall Street Journal has in the United States and one that it faces overseas. And because of the different standards, the moral question is somewhat different."

Bilahari Kausikan, press secretary at the Singapore Embassy in Washington, said the apology was probably made because The Asian Wall Street Journal's charges were "patently false."

Colombian Guerrilla War Heats Up Again

By Joseph B. Treaster
New York Times Service BOGOTA - In the last two ecks there has been a surge in fighting and rightist terrorism in Colombia's long gnerrilla war, sig-naling a further setback to President Belisario Betancur's efforts to bring peace to this country

Guerrillas of the April 19 Movement, or M-19, have carried out 15 attacks, including one in which they took over an entire town of 35,000 people and held it for nearly

Paramilitary forces, said to be closely associated with Colombia's armed forces, are believed responsible for bombing the headquarters of the Communist Party and gunning down two prominent lefust leaders, one of them an outspoken advocate of Mr. Betancur's peace initiatives.

In the last few days, M-19 has issued a series of threats to take over country clubs and public buildings and to kidnap executives of foreign corporations.

Apparently in connection with those threats, four guerrillas last Saturday fired submachine guns from a speeding car at a navy offi-cers' club where a children's party was under way. Two navy sentries

Belisario Betancur

traordinary alert. Truckloads of soldiers with rifles and submachine guns have taken up positions on downtown streets, and guards have been posted on the roof of the na-tional police headquarters.

Western diplomats and Colom-The military and the police in bian political analysts say they believe M-19 has been pressing the

Justice Ministry earlier this month About 100 persons were killed

when the military responded with overwhelming force to break a 28-hour rebel occupation of the ministry. The dead included 11 Supreme Court instance who make a process. Court justices, who were among dozens of hostages, and the 35 guerrillas who staged the attack.

The M-19 organization gained worldwide notoriety nearly six years ago when it invaded a cockiall narry at the embassy of the

tail party at the embassy of the Dominican Republic here and then held more than 28 diplomats hostage for two months. The guerrilla group accepted President Betancur's offer of a cease-fire in the late rebel groups had signed accords with the government.

But last June, M-19 announced guerrillas and kill some of their and they say they expect includes. The group also said it had been disappointed by the pace at Two small rebel groups. been disappointed by the pace at which Mr. Betancur was moving toward fulfilling its demands for have joined with M-19 in recent social reform.

fight to demonstrate that it is still a potent force after the debacle at the possible without M-19, which is believed to be the

guerrilla group.

The new violence adds to Coiombia's troubles only two weeks after the Nov. 13 craption of the Nevado del Ruiz voicano that killed approximately 25,000 people

and left 8,000 homeless The military, while problem expressing support for Mr. Betancur's efforts to disame the guernilas, has iceng been skeppical of this action. The armed forces chiefs have argued that attresties and truces only give the guerrillas an opportunity to recuperate and rearm for new adventures. Many diolomats believe the military is securs offer of a cease-me in the later several other cretly trying to subotage the president's peace ellosts through the use of parametery forces. For the moment, diplomats and

that it was breaking the truce, charging that the army had taken advantage of the lull to harass the polarized the makingy and M-19 and they can the makingy and M-19 and they can they are the makingy and M-19. and they say they expect increasing

Two small rebel groups, which months in military operations, and The leaders of the largest guerril- a third, the Popular Liberation la organization in the country, the Revolutionary Armed Forces of Colombia, say they remain committed to the truce they signed 18 a usix, the Popular Liberation Army, joined M-19 in the takeover of the town of Urrao, about 220 miles (350 kilometers) northwest of Bogotá, last week.

There have been chronic prob-. 625 Miles, however, in transporting refood from Ethiopia's ports. For

" st of this year, a shortage of g-haul trucks and frequent making highways have combined to ate a backlog of more than

100,000 tons of food at Assab, the main port.

The recent arrival of more than 400 new trucks, including 43 purchased by the Band Aid and Live Aid organizations, now has relief officials here saying the transportation problem is nearly solved.

There also have been and continue to be rancorous disputes between Western donors, who supplied 97 percent of the relief aid in the past year, and Ethiopia's Marxist government, whose major ally is the Soviet Union. The Ethiopian government has

refused to modify an agricultural pricing structure that Western economists say guarantees food shortages in this country of 42 million people. Ethiopia is listed by the World

Bank this year as the poorest country in the world, with a per capita income of \$120 a year. And it has what economists call a "structural food deficit," meaning that it is unable to feed itself even in years without drought.

Ethiopian farmers, some of whom till the most fertile land in Africa, must sell a large proportion of their surplus crops to the government at prices that do not cover the

Agricultural economists here say that most Ethiopian farmers respond rationally to such a pricing system: They do not produce more food than they and their families

Despite pressure from the World Bank, which offered more than \$100 million in concessionary farm loans in return for price reforms. the government here made no mafor changes in farm policy.

But during the past year, as Ethiopia became the most celebrated hungry place on earth, the government has been active on other

According to Western diplomats and relief officials, the government this year waged a major and sucfter a year of working with the cessful offensive against rebels in the north.

While humanitarian aid valued at more than \$1 billion poured into the country from the West, about \$1 billion worth of Soviet-supplied arms and ammunition was shipped at, which has spent \$280 million to Ethiopia to support the offen-

he past year while delivering sive, according to U.S. estimates.

James Cheek, the U.S. charg gone where it was supposed to d'affaires, said that "the past year" James Cheek, the U.S. charge d'affaires, said that "the past year's war has pushed the Ethiopian government deeper into the arms of the Soviet Union than ever." Accordingly, relations between

the U.S. government and Ethiopia "have not improved a bit," Mr. He added that the U.S. govern-

U.S. wheat stacked up at the Ethiopian port of Assab in March as it awaited shipment to famine victims. Since then, the arrival of new trucks has eased the problem.

ing the kind of long-term develop-ment programs that relief specialists say Ethiopia needs if it is to feed itself

Besides the offensive against the rebels in Eritrea and Tigre, for which the government frequently diverted long-haul trucks that it had promised to use in famine relief, the Ethiopian government has been active on two other fronts.

The government launched a nationwide "villagization" project that forces farmers to live in clusters of houses rather than on their farms. The program's announced purpose is to increase the availability of social services for rural peo-

But critics of the program, including several development specialists and members of the government's own Agriculture Ministry, say they lear the program will disrupt local food production.

The other major initiative, 2

iuge resettlement program, is intended to be a permanent solution to chronic famine in the northern highlands. The program, which has moved

nearly 600,000 people in the past year, takes farmers from the overpopulated and badly eroded northern highlands to more fertile lands in the southwest. Many Western relief specialists say resettlement is a sound idea.

From its beginning last fall, the government said resettlement would be voluntary, and that families would be kept together. According to reports from relief workers in the north, however, the program has not been voluntary in thousands of cases, and many families have been separated.

A recent incident here at Korem brought to a head the anger that

between Western aid workers and Ethiopian officials over methods

used to resettle famine victims. On Oct. 27, the government sent armed soldiers into the camp. According to witnesses, they rounded up 600 "volunteers" for resettlement and loaded them into trucks while about 10,000 residents of Korem, including some hospital patients, fled for the hills. They

stayed in the hills three days. Last week the president of Doctors Without Borders, a French voluntary agency that works at Korem, had an angry exchange in Addis Ababa, the capital, with the deputy director of the govern-ment's Relief and Rehabilitation

When people are taken away against their will, when the militia come to offer resettlement, obviously this is not a political problem; it is just a human problem." said Rony Brauman of Doctors Without Borders. "We don't feel that our role here in Ethiopia is to keep quiet.

"Why do all these people run away to the mountains?" Dr. Brauman asked Berhane Deressa, depu-

not be dictated to.

ty director of the commission. Because members of Doctors Without Borders agitate them," Mr. Berhane replied tartly.

Then, in an indignant tone, Mr. Berhane made a broader statement that underscored the uneasy, distrustful alliance that famine has forged between Western donors sume border duties. and Ethiopia: "I will not accept your insistence

on setting conditions. You will be humanitarian if you do your job. You are not competent to comment on any other aspect of our program. We have different ways of doing things in Ethiopia. We can-

Rebels Claim. After Contacts i Says Mine, Rocket He Believes French Hostages Are Well Attacks in Attacks in South Africa

The Associated Press

JOHANNESBURG - The Afthat it described as "a generalized escalation of its war on whiteminority rule.

The black nationalist group, in a statement issued at its headquarters in Lusaka. Zambia, denied South African charges that the guerrillas who laid the mines entered South Africa from Zimbstowe. It said the guerrillas were based and operating inside South

After the attacks, the South African foreign minister, R.F. Botha, accused Zimbabwe of harboring guerrillas and warned that South African forces would cross into

Zimbabwe in pursuit of them.

The mines have exploded just inside what the government calls its most secure border, the heavily policed frontier with Zimbabwe.

The rocket attacks on a key energy plant at Secunda, 80 miles (about 130 kilometers) east of Johannesburg, caused no damage, and three repels were killed.

But they showed that the insurgents have been able to smuggle in 122mm projectiles despite tighter security over the months of rioting. More than 800 people have been killed in 15 months of anti-apart-

heid unrest in South Africa In new violence Friday, the police said that plack suipers in the Crossroads squatter camp outside Cape Town had opened fire on a police patrol. The police said they responded with shotguns and auto-matic weapons, killing a black man and wounding two others.

Increasingly, opponents of apartheid are using conventional weapons instead of stones and gasoline bombs.

Meanwhile, the minister of law and order. Louis Le Grange, announced that the police, as of next week, will no longer help guard South Africa's borders. He said that policemen could not be spared from their duties in black townships and that the army would as-

[Police, using emergency regula-tions designed to curb rioting, banned the annual congresses of the National Union of South African Students and the South African Students' Press Union, due to have been held in Cape Town next week. Reuters reported Friday from Jo-

PARIS - A French government envoy said Friday that, after indirect contacts with kidnappers in Lebanon he believed that four French hostages held there were in good health.

Before leaving Beirut earlier, Rarican National Congress claimed zah Raad, a cardiologist of Lebaresponsibility Friday for land-mine nese origin, had been quoted as and rocket attacks in South Africa saving he had been allowed to examine a kidnapped diplomat, Marcel Carton, and found him in good "I have seen none of the hos-

tages," Dr. Raad said after his re-

turn from Beirut with another French diplomat. Pierre Blouin, the other member of a two-man team. But Dr. Rand said he believed the hostages were all in good health following indirect contacts with the kidnappers through the intermedi-ary, the Shiite Moslem Hezballah, or Army of God.

The French external relations minister, Roland Dumas, also said there had been no meeting with any of the kidnapping victims, but he added that the rescue mission had given hope for their release.

For the first time I am hopeful," Mr. Dumas said on French radio. "I have never used this expression before."

Dr. Raad said that remarks he made on the hostages' health before leaving Beirut were misinterpreted as meaning that he had met personally with Mr. Carton.

"I saw the doctors who treated him in Beirut and in Baalbek and I

Mr. Carton.

was given a health report." Dr. "At the beginning this report was alarming," he said, adding that a

week later the doctors told him that Mr. Carton's "condition had improved. He is now in good health." There had been fears for Mr. Carton's life since the shadowy Islamic Jihad organization said last week that one of its four French

hostages was "pitifully sick." Dr. Raad said he was very optimistic about the fate of the four French hostages. Along with Mr. Carton, the kidnappers are holding Marcel Fontaine, a diplomat; Jean-Paul Kauffmann, a journalist; and Michel Seurat, a researcher.

Asked whether he knew where the hostages were. Dr. Raad said: "I think they are separate, But they are being held by the same pro-

Iranian groups." Dr. Raad and Mr. Blouin arrived in Lebanon on Nov. 19 amid intensive efforts for the release of four U.S. hostages also held by Islamic

They arrived with Terry Waite, an envoy of the archbishop of Canterbury, who was returning to Beirut after meeting the Americans'

captors on a visit a week earlier. The French team came after Islamic Jihad said that France should stop "stalling" in negotiations over its hostages. The nature of the negotiations has not been disclosed.

that that they were not aware of this operation.

According to the high Israeli source, the examination came to four key conclusions.

• First, it found that Mr. Pollard approached Israel in April or May 1984 and volunteered to get classified information that might be useful to the Israeli government; that he appeared to have been primarily motivated by zealous pro-Israeli sentiments: and that he later asked for money for some services.

 Second, it found that the Israeli who oversaw his activities was a senior counterterrorism official apparently associated with the office of the prime minister's adviser on terrorism. That office is a highly secretive, independent body that looks into all forms of terrorism against Israel

The official has been identified by Israeli newspapers as Rafi Eitan, who was the prime minister's adviser on terrorism between 1978

and 1984, under Prime Ministers Menachem Begin and Yitzhak Shamir. Mr. Eitan has denied involvement, and the highly placed Israeli source declined to specify whether Mr. Pollard's supervisor was Mr. Eitan or another member of the same bureau.

The counterterrorism official funneled some information he got from Mr. Pollard to the general Israeli intelligence community without identifying the source or telling his political superiors what he was doing, according to the Israeli examination. • Third, the examination found

that Mr. Pollard initially offered to obtain U.S. intelligence information about Arab armies and Soviet military hardware in use in the Arab world, and was encouraged to do so by his Israeli contact.

Eventually, Mr. Pollard also sent his contact top-secret U.S. intelligence reports about highly sensitive Israeli military matters, the inquiry found.

Because of the deep knowledge of Israeli activities indicated by the U.S. intelligence reports said to have been passed along by Mr. Pollard, his contact became convinced that the United States had managed to "penetrate" the Israeli mili-tary establishment, the Israeli examination found.

As a result, the counterterrorism official began asking Mr. Pollard to provide as many U.S. intelligence reports about Israeli military activities as possible, hoping that thus the leak in the Israeli system could be tracked down, the Israeli inquiry found. At no time, according to the highly placed source, was Mr. Pollard asked to get any information directly related to U.S. national security or weapons systems.

• Fourth, the Israeli inquiry found that the information obtained by Mr. Pollard had been relayed to the two Israeli diplomats in the United States and from them directly to the senior counterterrorism official in Israel.

For the executive who likes to travel light...

The desk diary that's not desk-bound

The new IHT desk diary has as nuch noting space as most standard desk liaries, but condensed into a highly ompact portable format.

Bound in luxurious silk-grain black eather, the desk diary weighs in at just 340 rams (12 oz.) and measures 22 X 15 cm 8.5 X 6 in.). No space is wasted on unnecessary maps,

wilky economic data, voluminous demographic statisics—yet it has all the space you need for noting appointments. A removable address book, incorporated into the back cover, saves you hours of re-writing each

year. No need to pack a cumbersome, awkward volume when you travel --- yet you won't need to leave behind one of your critical business tools. The diary will fit easily into the

corners, gold page-edges, and French blue paper make it both practical and elegant. Personalized with gilt initials on the cover, this is the ideal desk diary for the executive on the move. The perfect

gift for friends, business contacts and associates. Order today. (And please note that quantity discounts are available.)

ARTS/LEISURE

Furniture Designs Incorporate Humor, Fantasy

By Michael Gibson onal Herald Tribune

PARIS — Remember Smokey Stover and his antic furniture in the Sunday color comics section? Well, if you did not know better, you might assume that he was the chief influence behind the current exhibition of the Salon des Artistes Décorateurs at the Grand Palais

As evidence of this, consider a straight-backed chair with its seat trimmed in snakeskin and an aquarium (with live goldfish) jig-sawed into the back. This is just one instance among hundreds that makes the whole thing a thoroughly entertaining venture, provided you are not there solely to find furniture for your home.

Indeed, most of the objects shown have manifestly been designed with the idea that a table should not look like a table, though it could possibly look like a scalemodel of the Louvre, preferably set beside a chair shaped like a lawnmower and a sofa shaped like a

There is, however, an automobile that looks like an automobile — a splendid, 186 mph (300 kph), wedge-shaped, leather and burrwalnut dream by Franco Sbarro; and there are a number of yachts and sailhoats that have their masts topside and their keels beneath the deck, which is conceivably unimaginative but nonetheless allows them to float.

Items such as desks tend to be less contortionistic than devices designed to seat the human frame. The latter apparently bring out a wild and slightly hysterical streak in many designers — as does the coffee table and the console. The result can be extremely funny although one cannot always be sure they were intended this way.

A chair has a sort of bovine stubbornness about it. It unimaginatively persists in standing on four legs, and in offering a back to support the sagging spine. You can try for variations and the number of legs can be reduced to three - or even one or two provided the base is broadened at ground level. But

Price of Truffles Soars As Result of Drought

The Associated Press

PERIGUEUX, France - The vear's first truffles, scarce because of a summer drought, have made their appearance in the markets of this city in south-central France.

Fetching nearly 2,800 francs (about \$360) a kilogram (2.2 pounds), or 1,000 francs more than last year, the delicacies are earning their name as the "black diamonds of the Perigord."

the basic Western idea of the seated or pen that can give the convincing man, knees bent at right angles and appearance of intricate life to a feet touching the ground, com-mands even the wildest digression

Zortzos and Papamakarios, with their zany snakeskin and goldfish gimmick, have apparently decided to thumb their noses at destiny. Others, who have come here with some austerely contorted constructions, are still wrestling with the

grim angel of chairdom. As for the desks, they do allow a certain range to fantasy and a number of offerings have taken advantage of these possibilities. Among these are the designs of Berthet and Sammut (a triangular variant of the secretaire), Pochy and Crumiere (with secret drawers) and the coolly elegant item designed by Pierte Paulin for President François Mitterrand. The architect Ricardo Bofill has a handsomely pearly table set on legs in the shape of neoclas-

sic pillars.

The salon also addresses the problems of designing telephones, computers, space stations, underwater living spaces, posters, rugs, toys and jewelry.

Salon des Artistes Décorateurs, Grand Palais, to Dec. 15.

The Paris Ecole des Beaux-Arts has a superb collection of Renaissance and Mannerist drawings of the Germanic, Dutch and Flemish schools that the public does not usually have the opportunity of

The exhibition, which will be moving in May to the Kunsthalle in Hamburg, includes 126 drawings, some of them in color, by such artists as Albrecht Dürer, Hans Baldung Grien, Urs Graf, Hans Bol and Pieter Coeck van Aelst. There are also quite a few Flemish artists whose work is inspired by the elder Brueghel - sometimes to the point of outright pastiche.

The exhibition makes one point quite clearly by presenting a number of works side by side: artists of that period did not think it improper to copy or imitate works they admired. Indeed, the notions of imitation and originality in art deserve some closer scrutiny today, when many artists are tempted to suppose that unhampered spontaneity will serve to express their most specific individuality. In fact the result is quite the contrary which leads one to wonder whether individuality does not reside elsewhere.

As for the delightful draftsmen of the 16th- and 17th-century Dutch, German and Flemish schools, their work is generally much livelier and more convincing than that of their Italian contemporaries whom they tended to admire. They also allow us to wonder at the quasi-magical power of the pencil

andscape the size of one's hand (there is an exquisite one by Jan Brueghel), a life that is usually more convincing in such small drawings than in more ambitious works done on large surfaces with the imposing means of oil or tem-

Julio González's "Woman at Her Toilette" (1914-18).

By Max Wykes-Joyce ONDON - The city of Barcelona has always seemed to me more French than Spanish, more so as its first language is Catalan, akin to langue d'oc rather than to Castilian; and partly from the feeling of a Mediterranean port like Marseille rather than an Iberian provinical capital like Cuenca, Seville or Valencia. Moreover, it is the commerical and industrial center of Spain. and not in the least like the rest of the traditional hidalgic country we

This difference from the rest of the country is not caused only by the Catalan demand for autonomy which has simmered in the peninsula since the 15th century, but is confirmed even by the quality and kind of art represented in "Homage to Barcelona" presented by the Arts Council of Great Britain in collaboration with the Generalitat (legislative assembly) of Catalonia and the Ajuntament (City Council) of Barcelona.

The exhibition ranges from the Barcelona International Exhibition of 1888 to the outbreak of the Spanish Civil War in 1936, though the real significance of the show ends in 1929 with the Universal Exhibition, marked by the design of the German pavilion by the Bauhaus architect Mies van der Rohe, of which there is a scale model created this year by a Catalan de-

The highlighting of Mies van der Rohe's contribution to Barcelonan art shows a peculiar anxiety on the part of the organizers to emphasize the international aspect of art in the city reinforced by the inclusion of works by Max Ernst, Yves Tanguy and Valentine Hugo among Tenerife, under the auspices of ADLAN - Amics de l'Art Nou (Friends of New Art) — a group of no less than eight sculptors. The . the city, and frequently traveling to formed by the city's artists in the three masters among them are France, Italy and Switzerland; he

The book, in short, is one of the most desirable works of art seen in recent years. It was bought for 8 million francs (about \$1.03 million) by H. P. Krans of New York, who says he bought it for stock. It is and seems determined to raise the tion, often by amateur dealers. funds to buy it.

accomplished on a larger financial scale. A Carolingian Gospel Book completed in the 9th century, probably at the Abbey of St. Amand in Southern Flanders was sold at £1.43 million (\$2 million), with sales charge.

The manuscript had not been seen in public since 1932, Hardly any living scholar has set eyes on it. and its appearance created a sensa-tion. De Hamel notes that while about 140 Carolingian books and fragments are known, only one fragment is preserved in the United States, in the J. Pierpont Morgan Library in New York "It is difficult to imagine that

any other illuminated Carolingian Gospel Book will ever come on the market," the cataloger teasingly warned potential buyers. But while minated initials are beautiful, there is no miniature and the manuscript is in poor condition.

The lettering done with a mix-ture of gold and copper has turned green, and the outlines of many etters have been bored through the vellum by oxidation, as in a jigsaw puzzle. The price, which far exceed-ed de Hamel's expectations, is all the more surprising. Most remarkable is the fact that, according to

acting strongly against specusilver predating 1700 exceedingly hardly be greater. That blanket description covers virtually any form of European painting that preceded or bypassed Impressionism.

It starts with such towering figures as Delacroix, Corot, and Courbet and goes on to painters for whom the word kitsch is still too probable, however, that he did do flattering — Frederick Goodall so at the instigation of a major and the like. If such an arbitrary American institution that was grouping has any common denomialerted to the existence of the nator, it is that all the artists in it manuscript days before the sale are the object of intense specula-

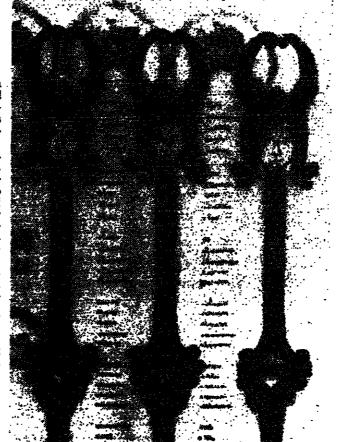

This week a comparable feat was accomplished on a larger financial to the Orientalists, defined by subject matter - Middle Eastern - rather than style or school, and concluded with Scandi-navian art which, dealers and auctioneers hoped, was to get a big painting held in London in 1984.

On Tuesday, they were all having a difficult time. More than 30 percent of the works offered failed to find buyers. As the bidding on a grotesquely sentimental portrait of a woman by Frederick Leighton, "Rubinella," stopped at £36,000, far below the £50,000 to £70,000

stable by Géricault was brought for wonderful landscape from Corot's first Roman period, done about 1830, rose to £35,000 — a fair price given its condition. Courbet's striking portrait of a sleeping peasant woman, seen seated with her head bent forward, did not do quite so well at £115,000, only slightly above the low estimate.

It was inevitable that some inferior paintings with high estimates reliable sources, the money came "from private individuals, not an institution."

The contrast offered by the sale of 19th-century European paint
Thor pamongs with alga estimates been ingred. A similar trend could be observed in a very different field, Island: art, both in New York on Nov. 22 at Sotheby's, and in London 19th-century European paint-

In Search of the Real Rembrandt

By John Russell

New York Times Service NEW YORK — It was the Rembrandt with which no visitor to the great museum in West Berlin had ever had any trouble, It was the epitome not only of Rembrandt, as he was popularly considered, but of a chivalric tradition that lasted well into the 20th century. Here before the delighted visitor was the "verray parfit gentil knight," first set before us by Geoffrey Chancer in his "Canterbury

Tales" 600 years ago. Friedrich Museum in central Berlin and was moved after World War II to the Dahlem quarter. All over the world there were houses and aparttion, and at the postcard stand it

was "a license to print money." So it was a blow to many people when last month it was declared to be not by Rembrandt, but the work of an unidentified contemporary. The revisionist opinion was backed by the Rembrandt Research Proect that had been set up in the Netherlands in 1969. The committee has a mandate to work through the whole corpus of paintings that - sometimes rightly and some-times wrongly - bore the name of Rembrandt. They could be wrong, as everyone else can be wrong in such matters, but as a matter of fact their opinion about "The Man With the Golden Helmet" has been shared for some years by almost every authority in the field. It is a beautiful painting, and it has for generations had an enormous con-

stituency, but it is not by Rem-Is it, therefore, a fake? A hoax? How could it have been so firmly upheld by Wilhelm von Bode, the foremost German scholar of his day, when he bought it almost 100 years ago for the Kaiser-Friedrich Museum, as well as other scholars of the day?

There is undoubtedly a halfworld of faking and forgery, but what we are concerned with here is a different matter. People of experience and integrity can be "right" in their own day and "wrong" in

the opinion of posterity.
The Man With the Golden Helmet" came to the Berlin museum at a time when art history was in its infancy. Connoisseurship was largely instinctual - a matter of experience, memory and flair. To have "an eye" was the fundamental thing. The disciplines of documen-tation lay in the future, as did the armory of scientific investigation that grows more formidable year by year. The word of a Bode was as ling, in those days, as a handshake between men of honor. It should be remembered that those were expansive times. The more

Rembrandts there were in the world, the richer we all would be. It is also natural that anyone who had a Dutch 17th-century painting to sell in those days would call it a Rembrandt if he possibly could. Present-day historians have identified and validated a great many Dutch 17th-century painters who had a style, a personality and an attraction that is distinctly their own. Before 1914, and even before 1939, many of those artists were lost in the crowd and discarded.

The big names were what collectors

One of the great tasks of art another. scholarship since 1945 has been to redefine the authentic achievement oil painting is not a constant. It is a of Rembrandt. In the process, deep wounds have been inflicted.

most beautiful paintings in the as repainting, clumsy restoration or world has often been, and some downright "improvement" — must times is still, disputed. This is espe-cially the case when a master-pupil relationship thickens the plot.

There is in the Louvre a famous The painting in question was Venetian 16th-century painting "The Man With the Golden Hel- called "The Concert," as to which Venetian 16th-century painting met." For many visitors it ranked no one can be quite sure whether with the bust of Queen Nefertin as Titian or Giorgione had the greater the single most memorable object hand in its authorship. There is in England another Venetian painting of the period, a "Judgment of Solomon," as to which the name of Giorgione was long preferred to the world there were houses and apart-ments in which it hung in reproduc-of Sebastiano del Piombo. There is in the current show of works of art from the Liechtenstein collection at the Met a portrait of Jan Vermoelen, a citizen of Antwerp who served in the Spanish navy and died in battle. As to whether it is by van Dyck or by Rubens, scholarship has yet to make up its collec-

tive mind We can count ourselves lucky to be living in an age in which scholars do not rush to unfounded conclusions but are ready to return the interim answer that these are works of art of very high quality as to which the votes are not yet all in. None of these paintings is diminished by disagreement. We are dealing with very considerable works of art as to which differing opinious may be legitimately held and supported with rational argu-

Even so, it may still be asked how the errors of experienced peo-ple can go undetected for so long. The first reason is that every generation has its own way of seeing. If what looked right to Bode does not look right to us, it is not because

Bode was not up to the job. It is because he was the captive, as we all are, not only of the information that was available to him but of the ideas, the loyalties and the hierarchies of his day. In particular, there is in painting a vocabulary of form that looks natural and predestined at any given moment in time and may look stilted o

many-layered vegetable construct The first thing to remember is from year to year. (Other, more that the authorship of some of the drastic, man-made changes — such painting, and one to which we bring different eyes, a different set of references and a whole new mass of information.

> differently without rejecting its attribution. If we happen to be the Duchess of Alba, and one of the Titians on our walls in Madrid has been there since it was painted and is further authenticated by a letter from Titian himself that is also in our possession, it would be a bold man who dared to say, "That can't be right." But it is rare for even a great painting to be so well documented, and there are many as to which we have almost no documentation at all.

> brandt is relatively a simple one in that the Netherlands of his day was a small country, just as it is now. Evidence is there in abundance, if we are ready to dig deep enough. Since Bode's day, our knowledge of Rembrand's milien has been vastly enlarged. Sometimes his name has been added to a work where it had not been thought of before. Such is the case with the "Anna With the Blind Tobit" in the National Gallery in London, which is now believed to be the joint work of Rembrandt and Gerrit Dou, More often, his name has been taken away, as has happened to "Rem-

We are witnesses, in fact, to the slow emergence of an ever smaller circle of Rembrandts. There will be many another demotion before the process is completed, but it is safe to say that not many of them will touch as deep a chord of feeling as the exclusion of 'The Man With

affected or just plain ludicrous at

Next, we must remember that an that changes, no matter how subtly downright "improvement" - must also be taken into consideration.) We cannot know how "The Man With the Golden Helmet" looked to Bode. We only know how it looks to us now. It is a different

Time to Enter the EMS

Britain is again debating whether to become a full member of Europe's monetary system, the EMS. Prime Minister Margaret Thatcher hedges. Many doubt the wisdom of her uncharacteristic hesitation.

After fixed exchange rates were abandoned, currencies gyrated so widely that business planning — and employment — were seriously affected. The EMS sought to attenuate the confusion through a plan to keep parities within Europe fairly constant. When market forces threatened to push an exchange rate beyond a certain narrow limit, governments were committed to intervene

- by operating in the currency markets or adjusting their general economic policies so as to keep the movement within agreed bounds. In extreme cases, parities could be adjusted, whereupon the game to defend a new pattern of exchange rates began again.

The system has surprised the skeptics even in Britain, which stayed out. Despite the vast growth of international money movements, short-term fluctuations between European currencies have been limited because countries have tried harder to keep their general economic policies in line. Whether this better policy alignment was caused by the EMS or vice versa is a chicken-and-egg question that will never be answered, but the achievements are plain. Particularly striking has been the smoothness with which occasional parity changes have been made when defense of a currency proved no longer possible - very different from the previous damaging wrangling. Something of this European spirit can be seen in the broader international agreement two months ago to get the dollar down and the yen up by coordinated action.

If Britain now came in, its inflation problem would be eased. Knowledge that its currency was henceforth linked with that of low-inflation West Germany would strengthen the resolve of British business to prevent labor costs from rising faster than abroad. And since sterling would be more trusted internationally, it would no longer have to be defended by high interest rates.

A steadier pound would make British industry more adventurous, because businessmen could judge future profits better. Last January, Britain had to raise its basic interest rate by as much as 4½ percent to protect sterling. Whereupon the pound, having fallen 8 percent against the Deutsche mark in three months, shot up by 17 percent, unsettling business in an already cold climate. Mrs. Thatcher fears that sterling will always swing because Britain is a major oil producer, and oil prices change. But the swings would probably be less if sterling were inside the EMS. And since oil is about to become less predominant in the British economy, this particular objection is unconvincing.

British adhesion would boost European unity - and assist painful efforts at the Community summit, which starts on Monday, to achieve a real common market by 1992. It could also provide a convenient occasion for modest changes in Europe's existing exchange rate pattern, particularly between France and West Germany.

The main argument, however, is that entering the EMS would make Britain more prosperous and stable. Adhesion should be prompt. If it can prove its worth before the election in 1987 or 1988, it will be harder for a new government to pull out again.

INTERNATIONAL HERALD TRIBUNE

Rain Forest Can Survive

The tropical rain forests that girdle the equator are being rapidly cleared, and the destruction usually leaves nothing of comparable value, only floods, drought and barren iand. To resist this devastation, the World Resources Institute of Washington has devised an imaginative plan that was considered last week in The Hague by delegates from inter-national aid agencies. They are being asked to pledge half the \$8-billion cost of the plan, with the rest to come from private corporations and the nations directly affected. The money would go for reforestation projects and other livelihoods for those who exploit the forests.

39

Tropical rain forests appear fertile because of the diversity of species they support. But the richness comes from 60 million years of evolution, during which species proliferated and developed intricate interdependencies, like fig. trees that nurture a particular wasp that pollinates them. But the soil is almost always poor. because the rain leaches out nutrients. Farmers who clear the forest land learn that

lesson after the first or second crop. They abandon the land to ranchers, who burn the weeds and raise cattle for a few seasons. But the rains compact and devitalize the soil, then erode it. With the forests gone, floods follow: even the rains decrease. Each year, 11 million hectares of the world's rain forests are wasted. All could be gone within a century.

others allow forests to become moonscapes?

Population growth and land hunger are the usual explanations that officials give. But there plenty of land; the problem, as Catherine Caufield recently noted in The New Yorker, is that 4.5 percent of Brazil's landowners own 81 percent of the farmland. In El Salvador, 2,000 families own 40 percent. Colonizing the forest deflects the pressure for land reform.

Shortsighted governments also yield logging concessions. The loggers take one tree in 10 but destroy many more. Their roads make the forests accessible to farmers and ranchers, who complete the destruction. Everyone makes a quick profit, ignoring the cost of replacing the trees - which, were it possible, would take 100 years or longer. "Destroying rain forest," Nicholas Guppy has written in Foreign Affairs. "is a means of avoiding tackling real problems by pursuing chimeras: a license to print money which yields quick cash at the cost of ultimate catastrophe.

The governments of nations endowed with rain forests are principally to blame, but foreign loans have abetted the rape. The tragedy is that rain forests could be used productively, in ways that do not destroy them or the tribal peoples who inhabit them. The real causes of deforestation, the World Resources Institute concludes, are poverty, skewed land distribution and low agricultural productivity. If those can be addressed, the rain forests and their

- THE NEW YORK TIMES.

Farewell to 'Fairness'

Since the last presidential election, the Democratic Party's National Committee has conducted 43 focus groups and commissioned a poll of 5,500 voters to learn how to appeal for votes. Last weekend the committee revealed its first findings. "When party leaders talk about fairness," a spokesman said, "middle-class voters see it as a code word for giveaway."

"Fairness" was the party's formula in 1982, when Democrats won a majority of votes cast for all offices. Is it a guaranteed vote-loser now? That depends on the kind of fairness.

In 1982, Democrats attacked Reagan Republicans for cutting taxes for the rich and threatening to cut Social Security for the ordinary person. In a recession year the appeal paid off, but that may have been the last time this familiar rule worked. In the 1930s and 1940s the great middle of the American income spectrum tended to see itself as the under half of society, with interests contrary to those of the rich on the top, and Democrats preaching "fairness" won most elections in those days. But in the 1970s and 1980s most Ameri-

cans tend to see themselves as middle-class. The more success a democracy has in eradicating poverty, the smaller the political constituency for eradicating the poverty that re-mains. "People are telling us, 'Please don't ask us to care for people down the street before we take care of our own family's economic securi-" one Democrat said. The chairman of the National Committee, Paul Kirk, said the Democrats would not leave the disadvantaged behind. But for both parties, appeals that work best speak to the selfish interests of voting blocs -- farmers, loan-hungry college students, soon-to-be Social Security recipients.

The long-term interests of the nation and of the parties depend on fostering and focusing a spirit of generosity. The Democrats now suggest programs to help young Americans move upward to be college graduates, jobholders and homeowners—the kinds of programs that helped create the vast middle class of today. But none of these worthy initiatives translates directly into a formula to replace "fairness."

- THE WASHINGTON POST.

FROM OUR NOV. 30 PAGES, 75 AND 50 YEARS AGO

1910: More Ships Adopt Telegraphy PARIS — Wireless telegraphy is already an old story and its importance as an aid to navigation needs no fresh argument. But its employment as a feature of a ship's equipment has been largely confined to the North Atlantic passenger service. Steadily, however, this system is being extended into Far East and Pacific waters. At least one line following these trade routes has equipped some of its vessels with wireless apparatus, and the general tendency to take every possible precaution against disaster was shown recently when the Austrian Minister of Commerce issued regulations requiring all Austrian vessels voyaging farther than Gibraltar or Aden to be equipped with wireless telegraphy apparatus. This may detract from the romance of the seas, but it will add much to humanity's peace of mind.

1935: The Centenary of Mark Twain PARIS - The centenary of Mark Twain is being calebrated the world over [on Nov. 30] by those who have delighted in the humor, pathos and force of "Huckleberry Finn," "The Adventures of Tom Sawyer" and other works of the man whose wit made him the jester of his era. Mark Twain came into the world 100 years ago in a little Missouri town named Florida. He died in 1910 after encountering fame and bitterest disappointment. His country had showered him with money, honors and university degrees because he was the funniest fellow that had ever been born in the United States, but nobody would take him seriously. The men he denounced loaded him with honors. They laughed when he said: "Ain't we got all the fools in town on our side, and ain't that a big enough majority for any town?"

How to Help the Soviet Union Get Out of Afghanistan

PARIS — American leaders came home from Geneva with the impression that Moscow now would like to find a way out of Afghanistan. This was conveyed in public by Soviet spokesmen, who repeatedly spoke of the need for a "political solution," as well as officially in private. They emphasized the role that United Nations mediation should play.

There are many reasons to take this seriously, but there are also reasons why it will not be as easy as a simple ukase from Moscow.

The war has dragged on for six years without any "light at the end of the tunnel" - to dispense with the Vietnam comparison. The cost and casualties have become a serious nuisance for the Kremlin, although they are not intolerable. They could go on indefinitely.

NATO intelligence shows an increase in Soviet military action in Afghanistan recently, but that is not considered contradictory to Moscow's message about a settlement. It could well be a last effort to achieve as favorable a military situation as possible before an attempted truce. The war in Afghanistan has become a serious

irritant in Moscow's relations with the Third

World, as the last UN condemnation showed. It

is also an obstacle in Moscow's search for better

relations with Beijing, and President Reagan has made clear that Washington considers it a major test of Soviet intentions. So there are internal and external reasons to support the assessment that Moscow is prepared to seek a compromise. They may not be the most important, however. The spread of militant Iranian-type fundamentalism has be-

come a new factor in the situation, worrisome

throughout the region and possibly a threat to

By Flora Lewis

the stability of the Soviet Moslem population. In addition to the three million Afghan refugees in Pakistan, there are a million in Iran. The office of the UN High Commissioner for Refugees found that they are well received, estabished in towns and cities as well as in special settlements and becoming thoroughly indoctri-nated with Ayatollah Khomeini's ideas. Funda-mentalism is also gaining in the Afghan camps in Pakistan, which is already an Islamic state

but is trying to hold Iranian extremism at bay. The evidence is that this trend can only grow as the conflict drags on. Everybody involved

except Iran has to see it as a danger for the whole area. It is one point in this brutal war, which America first saw as a Soviet drive to-ward the Gulf, on which U.S. and Soviet interests have come to coincide. The radical religious menace is proving greater than the Soviet menace in a way that American arms to the dauntiess Afghan rebels cannot confront. Moscow has to realize that no possible agree-

ment could leave the puppet regime of Babrak Karmal in place; it is much too hated and discredited. Nor is it conceivable that any kind of international guarantees could prop Mr.

Karmal up, even if the United States agreed to ry, which it will not and should not do.

I STANCOMOS

At most, America could agree to stop providing arms to the rebels and give some economic aid to a new, acceptable regime, which would have to be independent and nonaligned. Even so, it would be extravagant to expect Pakistan to seal the border. It has always been an open border, which Afghans well know how to cross. Estimates are that it would take an army double the size of Pakistan's to close it effectively.

The problem then is to cross.

The problem, then, is to create a government that could hold its own and install peace by majority consent. The sad fact is that no such alternative regime is visible. There is no government in exile. The rebels are divided and hostile among themselves. The Russians have created a monster that they cannot durap and replace In a way, their situation is worse than Ameri-

ca's in Vietnam, because there is no Hanoi to move in, impose order and let them off the hook, even in ignominy. An imprepared pullor would leave chaos, not a new non-Soviet order This is certainly Moscow's fault and it helps explain why Moscow is willing to talk to Washington about Afghanistan. It is also why America should repress the temptation to gioat about ca snown repress the temperation to goat about the Kremlin's trouble, and should try to help fashion a competent substitute that could be installed with international support in Kabul. That will take time, and is probably beyond

the capacity of UN mediators. America shouk support political talks among the rebels now looking to the day when a new regime can be organized. Even if Moscow has good new inten tions; they will not be enough to end the war.

The New York Times.

The United States Cannot Ignore Hunger and Poverty in Africa

Africa are very far away from America, in both distance and circumstances. Many Americans have difficulty imagining the conditions in which most Africans live. Some also question the extent of American responsibility there. Africa seems to them so far away, and they question whether aid can make any real difference to its seemingly unending plight. This is a sadly shortsighted view, for there are strong moral and practical reasons

why Americans cannot ignore Africa.

The scng is right: "We are the world." America and other wealthy societies share the planet with hundreds of millions of people who lack the basic necessities of a decent existence. The tenets of all religions and most political philosophies hold that the rich have a fundamental responsibility to help the poor.

It is also in the best secular tradition to act boldly in an emergency and to show humani tarian concern without undue preoccupation with geopolitical or strategic considerations. Vast numbers of Africans face starvation and death, and their circumstances invoke our responsibility with particular urgency.

Simple statistics reveal the gap between American wealth and African poverty: An average African's income is less than onethirtieth of the average American's. The gross national products of all 46 sub-Saharan African states amount to less than 6 percent of U.S. GNP. Africa must support 400 million people on an economy that produces no more than the state of Illinois.

The fact that millions of Americans responded as generously as they did in 1984 and 1985, with at least \$170 million in donations to ease African misery, symbolizes the readiness of Americans to respond to human pain. Even beyond humanitarian considerations, there are compelling reasons for the United By Lawrence S. Eagleburger and Donald F. McHenry

States to help Africa today. America's economic interests on the continent, for example, go beyond concern about oil in Nigeria and strategic minerals in South Africa and Zaire. A stable, developing Africa could eventually provide other raw materials and an expanding market for industrial goods. Africa matters politically as well. If the United States genuinely cares about advanc-

ing the cause of freedom in the world, then Africa, with its dozens of independent countries, certainly merits attention. There are also Western security interests at

stake there. The gap between the world's rich and poor countries continues to widen with most of Africa at one extreme and the United States at the other. That gulf, and the turmoil arising from persistent economic chaos, might well be exploited by those, such as anti-Western fundamentalist movements, interested in advancing narrow political, ideological or military interests. But an American commitment now to Africa's growth could help break down divisions that will only grow more volatile if they are allowed to persist.

International divisions may also cause division in America itself. Hostility or desperation in Africa can trigger racial feelings in the United States. In an interdependent world, it is important for the United States and for everyone else that Africa develop its human and physical resources as fully as possible.

American experience can help Africa. In the 1930s America faced a depression in its western and southern farm belts similar to what we see in Africa today. That crisis was

ended by years of long-term concessional finance, work programs, soil and water conservation projects and university programs to

elp farmers cope with new challenges. Africa can use America's scientific capability in agricultural research, medicine and information. Its Peace Corps, international businesses and voluntary agency staffs offer a large bank of experience to draw upon.

America can help, and it should. The world cannot truly advance as long as one of its parts -a huge continent - lags far behind.

Mr. Eagleburger, a former U.S. assistant secretary of state for European affairs, and Mr. McHenry, a former U.S. ambassador to the United Nations, are co-chairmen of the Committee on African Development Strategies, which will issue a report on Dec. 2. They con-

But African Governments Need to Come Clean on AIDS OS ANGELES - Did AIDS

By Harry Nelson

L originate in Africa? Many scientists think so, but the hypothesis is cloaked in mystery abundant circumstantial evidence but still no convincing proof. Many African governments deny that the disease even exists within their boundaries, let alone that it may have spread from there. Studies presented on Nov. 22

and 23 in Brussels at an international conference on AIDS in Africa added evidence that the disease is spreading at a frighten-ing rate in parts of the continent. The focus is Central Africa, notably Zaire, Rwanda, Burundi and

Uganda. But the disease appears to be spreading to Kenya and countries to the south. Dr. Robin Weiss, of the Ches-

ter Beatty Laboratories in London, told the Brussels gathering of about 700 scientists that "AIDS is few in number — are at the mercy a spreading disease that has become pandemic in much of tropical Africa." Dr. Nathan Chimeck, may use any excuse not to coopera Belgian AIDS researcher who helped diagnose some of the earliest detected cases from Africa. said that many African countries have not been reporting AIDS to

But scientists who wish to do AIDS research must avoid angering prospective host governments. archers doing needed epidemiological and other scientific studies in Africa -- aircady 100 of governments that often tolerate their efforts reluctantly, and that ate, or even to expel them.

Officials in Central Africa have clamped a tight hid on the news media's access to AIDS rescarciaers within their borders. "We the World Health Organization. don't want any reporters coming Times medical writer.

official of the Ministry of Health told a reporter last April.

The pursuit of knowledge is difficult in an environment of suspicion. It is understandable that African nations do not want to be identified as the place where AIDS originated. But if it did originate in Africa, scientists are convinced that studies there would have great value for understanding the virus -a virus that must be controlled if the worldwide epidemic is to be contained.

Mr. Nelson is a Los Angeles

A Plainspoken People Ought to Speak Up Plainly

AMBRIDGE, Massachusetts -There are few matters in which Americans have taken more pride than their commitment to plain speech. All have heard it: We are a down-to-earth, plainspoken people; we abhor evasion or cant. And with this have gone two other claims: We Americans believe ourselves wisely alert to political motivation, evasion and chicane. And we are also deeply attached to the thought that more income is more enjoyable than less.

I would like to urge that our sup-posedly forthright habits of speech be allowed to express what we all know to be true about politics and money. Specifically, we accept that politicians and political parties come to power with an obligation to their sup-porters. This normally involves improving their supporters' income. Yet this may not be mentioned in our time. Or, if mentioned, it is subject to

indignant denial and rebuke, Thus, the Reagan administration came to office with the strong support of the more affluent -company executives and corporate politicalaction committees, the financial community, our more successful entrepreneurs, the otherwise comfortably rich as a class. There were many others, to be sure. To those just mentioned, Ronald Reagan was most visibly beholden. From them came the large sums by which in our democracy political persuasion is all too extensively accomplished. Those so

contributing were obviously in line for tangible economic reward. Here, however, our commitment to candor came to an end. Three basic policies were early put in place by the administration — supply-side tax reductions, an astringent monetary policy, a large increase in military expenditures. All had a wonderfully favorable impact on the upper-income brackets. All politically were a wholly normal reward by Mr. Reagan to his constituents. This, however, could not be said. Even Democrats were unnaturally reserved.

Thus the supply-side tax reductions with their large absolute benefit in the top income brackets and the companion cuts in social spending could not be seen as a service to the rich. Mr. Reagan angrily denounced a few vagrant statements to this effect as demagoguery. It was purely a design for invigorating the economy, "incentives" being the magic word. The rich were not working because they had too little income, the poor because they had too much.

There was a major sensation in 1981 when David Stockman conceded that this was all really a cover for reducing the taxes on the affluent. Public admission of the most predictable of political motivations became an occasion for major surprise. Mr. Stockman was called severely to account. The American reputation for plain speech, indeed!

The suppression of our much cele-

By John Kenneth Galbraith

brated candor is even more complete namic of the arms race, the conservaas regards monetary policy. Such policy is held to be neutral as between rich and poor. In fact monetary pol-icy works through high interest rates that restrain the bank borrowing by which bank deposits are extensively created. Such interest rates are very welcome to those who have money to lend. Those who have money to lend normally have more than those who do not have money to lend. As economic truth, this stands with the pos-sibly apocryphal theorem of Calvin

Coolidge that when many people are out of work, unemployment results. Nor is this all. While rewarding those who lend money, monetary pol-icy works by creating the unemployment that curbs union claims. And high interest rates attract from abroad the funds that bid up the dollar, discourage exports, make imports cheap, keep farm prices down. We not only redeem our reputation for clear speech, but have a much better understanding of monetary policy if we recognize both its service to the affluent and its highly regressive effect on workers and farmers. A more complex set of motivations is involved in the third major policy of the administration, the huge in-crease in military spending. The dytive fear of communism, the liberal fear of being thought soft on communism and the bureaucratic power of the Pentagon are all involved. But since the days of Dwight Fisenhower no one has doubted the powerful economic interest of the industrial half of the military-industrial complex.

Weapons expenditures reward well paid executives, technicians and stockholders. Economic interest is sustained in Washington by a remarkably effective array of well lubricated lobbies, now commonly called consultants. A budget policy combining curtailment of social programs with large continuing weapons expenditure reflects an interest of the affluent in having more money. And once again this is little mentioned. Such were the earlier services to the

proposed tax bill. The cover story is simplification. The important intent and effect is a further major reduction in the top personal income tax brackers. But this must not be said. At most, only whispered. There is, it is clear, a basic asym-

affluent. They continue now in the

metry in our political discourse. One can be for help to the poor — to the hungry, the homeless, those without jobs or prospects. But one cannot be

rich. America does have such policies; they are a wholly predictable aspect of our political alignments it is only that this must not be said. The rich in our time have become a dirty secret. There must be that cover story, however improbable. This effort at evasion is even de-

rogatory of the affluent. It implies that they are somehow disreputable. Yet it is not thought intrinsically wrong under our system to have money and want more; it is not un-American. Dr. Johnson thought the pursuit of wealth one of the least harmful activities in which men were employed. Once, of an evening, while watching a large New York office building empty itself of its occupants, I thought how much better that those

people were so engaged, not instead on war, politics or religion. What is astonishing is this effort to conceal obvious political and pecuniary motivation behind unconvincing protestations as to some implausible public good. That, to repeat, is to reject a proud claim to clear thought and plain speech. And surely the disguise succeeds only with those whose beliefs are too easily cultivated.

The writer, emeritus professor of economics at Harvard, contributed this comment to The New York Times.

In response to the opinion column * Détente Is Back, Europeans Have Tall ing to Do" (Nov. 23) by Willy Brands --

The European allies of the Unite only to destroy but also to create."

A Master of Language and Conscience

WASHINGTON — When Mark Twain and his wife Livy were alone or with friends, she called him "Youth," seemingly an odd nick-name for the bewhiskered figure we remember from photographs. But maybe not so odd when you think about it. The great American writer -his 150th birthday falls this Saturday, Nov. 30 - was the creator of those everlasting youths. Huck Finn and Tom Sawyer, and much of the river-town waif Sam Clemens lin-

gered in the mature Twain. There was, of course, much more than perpetual youth in him. A milewide streak of misanthropy stains his later writings, a savage despair barely veiled by satire. But despair (think of James Thurber in our time) seems to be the curse of great comic writers; and they are fortunately far more than the sum of their despairs.

Twain left two legacies - a book and a way of writing English — that outshine the darkness behind them. Ouite apart from that personal conquest of darkness, there was

something heroic in Twain's achievement. He came of age as a writer in the last quarter of the 19th century when American public-spiritedness and conscience were dimming, a time he unforgettably labeled "the gilded age." Yet he for his part was forging his harred of cruelty into the river-odyssey tale of Huckleberry Finn and By Edwin M. Yoder Jr.

Nigger Jim, a tale sometimes called "racist" but in fact the very opposite. "The Adventures of Huckleberry Finn" ran against the sluggish current of the age. America was falling wearily back from Lincoln's vision and phinderers were in the saddle.

Even as Twain portrayed slaves as human beings, not only in "Huckleberry Finn" but also in "Puddenhead Wilson," various new theories of racial superiority were being minted. They were designed to rationalize the backsliding from the promise of ra-cial equality, or to justify the submergence of peoples of color ("half devil and half child," as Kipling would write a few years later) under the tutelage of Victorian imperialism.

Twain seems to have been among the few in his time who discerned the connection between domestic institutions built on racial discrimination, and the imperialist fever that overcame even such younger Americans as Theodore Roosevelt.

In one of the most telling scenes of "Huckleberry Finn." the rustic Huck weighs his disconcerting impulse to help a fellow creature against the demands of "conscience." He casts this depraved "conscience" aside, saying that if hell is the price of helping a runaway slave, so be it. It would

however, be many decades before the national consciousness caught up

with Twain's vision of natural justice. Then there was the way he wrote. For all his rustic poses, he had a delicate ear for language. Up to and beyond the Civil War, the literary tradition had demanded a distinction between the formal language in depend on existing institutions. The which literate folk expressed them general climate of liberalism allows ? selves and the racy dialogue forms of Western or Southern burlesque, It was Twain's contribution to blend

them, to end the false separation. De Voto, could have written "the fling for pleasure can take him to one calm confidence of a Christian with of the sex capitals of Southeast Asia four aces." Perhaps a later novelist exaggerated when he said that all modern American writing "comes from the United States to Kenya out of one book" by Twam, but there

is a case for saying so.

The year "Huckleberry Finn" was serialized, 1885, happened also to be the year that the painfully stricken Ulysses S. Grant, with Twain's help and patronage, was struggling in agony to finish his no-nonsense "Memours." Both books would ultimately be recognized as early monuments of American plainspeak. slates, Japan, west Germany, France, Britain, Italy and Canada — slowed from 5.7 percent a year during the 1960s to 3.6 percent in the 1970s and has averaged only 2.2 percent in the 1980s.

The U.S. annual growth rate declined from 4.2 percent in the 1960s to 2.1 percent in the first half of the 1980s. In Europe the 1960s to 2.1 percent in the first half of the 1980s. In Europe the decline has been steeper. Real growth—the annual increase in gross national product, adjusted for inflation—is estimated at 1.2 percent in West Germany and France and 1.1 percent in Britain from 1980 through 1985. Japan has averaged a 4.3-percent rate of growth in the 1980s, after 11.6-percent growth in the 1960s.

The elegators in growth of the industrial countries has opened

The slowdown in growth of the industrial countries has opened wide gap between actual output and what economists call potential output— the production that could have been actual achieved if labor and capital had been utilized at a high rate.

The gap between actual and potential output has increased unit labor coefficients and unit labor coefficients.

rates and unit labor costs. Despite the immediate recovery, Edward L. Denison of the Brookings Institution stresses in a new study, "Trends in American Economic Growth, 1929-1982," that the 1973-82 period of slow growth is not over. The United States, he says, now has "the largest reserve of unused productive capacity since the 1930s." Wage pressures, he adds, have been restrained by the long duration of unemployment and the recognition of the productiviy slowdown.

Is inflation only taking a holiday? While holding that inflation is never dead but only dormant, Morgan Guaranty declares, "By every estimate, enormous output gaps prevail today in the major industrial countries." The gaps between potential and real output, it estimates, range from about 5 percent of gross national product in the United States and Canada to more than 13 percent

France and West Germany.

Such gaps are likely to persist in the years ahead, restraining uing to curb inflation but car lielelic in humemployment and gluts of commodities and manufactured goods.

Mexico Oil Prices

Increases Affect Only Light Grade

Compiled by Due Staff From Dispatches
MEXICO CITY — Encouraged
by a firmer market and growing
winter demand, Mexico has announced that it was raising prices of its light-grade crude oil by an average of 76 cents a barrel. It was the second price increase in two

The government oil company, Petròleos Mexicanos, said that the new prices, which go into effect Sunday, would remain in force through December. Mexico has different prices for its two types of oil, the light-grade Isthmus and the heavier Maya.

As in the past, the new prices are

As in the past, the new prices are based on the buyer's distance from Mexico, with the most expensive fees being charged to the closest countries. The government lowers its prices to countries far away to

offset high shipping costs.

Pemex's announcement Thursday said that the price of 1sthmus would rise to \$27.45 from \$26.90 per barrel for the Far East, to \$27.60 from \$26.75 per barrel for Europe and to \$28.25 from \$27.60 per barrel for the United States.

A similar increase in Isthmus prices that went into effect Nov. 1 ended more than a year of price cuts for the light crude oil. Maya prices were cut then for the fourth

Maya oil prices will not change.

time this year.
"The December price increases correspond to the usual increase in consumption of crude during the winter season," Pemex said. "They are also aimed at correcting distortions in market demand for light and heavy hydrocarbons."

Although Mexico is not a member of the Organization of Petroleum Exporting Countries, it had followed the cartel's pricing guidelines until last summer, when it broke away as the world oil market weakened and the country's sales plunged by more than half.

Mexico slashed prices in July and exports since then have recovered with November sales reaching 1.52 million barrels a day. Pemex predicted it would sell 1.55 million partels of crude oil daily in Decem-

Oil sales make up three-fourths of Mexico's total export revenues and are the principal source of capital for making payments on its \$96.4-billion foreign debt.

U.S. Orders Halt To Import of **Most EC Steel**

By Carl Hartman

WASHINGTON - Most steel imports from the European Community have been halted because the 10 member governments have failed to approve an agreement to limit European shipments, the Customs Service said Friday.

European approval of the Nov. 1 accord was held up because Britain wants assurances it can ship at least 300,000 tons of unfinished steel next year to a plant in Tuscaloosa, Alabama, according to a European source, who spoke on condition of anonymity. The source said that the British have an interest in the plant, which he did not identify.

The Customs order prevents entry or release of European steel to the U.S. market, except for pipes and tubes. It took effect Thursday, but was little noted because of the Thanksgiving holiday in the United

Stan Gustafson of the U.S. National Steel Fraud Program, a domestic industry pressure group, calculated that the action affects all but \$200 million of the \$1.5 billion worth of basic steel mill products shipped to the United States from the EC this year.

"We hope this measure will speed up the agreement," he said. The Resgan administration is trying to hold down imports of steel to preserve orders and jobs in the depressed domestic steel indus-

Venez, belly, 11.25 LONDON - The European Community, apparently giving way to Saudi Arabian pressure, has delayed a final decision on whether to impose a tariff on imports of Saudi ethylene glycol, a raw material for antifreeze and polyester.
Tariffs of 13 percent imposed

earlier this year on Saudi polyethylene and methanol provoked threats from the kingdom that it would retaliate by imposing higher tariffs on the \$11 billion or so of goods it imports annually from EC coun-

The EC's executive commission published earlier this week a notice saying that it had imposed a 13percent taniff on glycol from Saudi Arabia. But an EC spokesman in Brussels said Friday that the publication was a mistake. The commission had been "on the point" of imposing the tariff, but no final decision had been made, the spokesman said. He said the commission was studying a submission on the Sandis' view and probably would make a decision in about

European chemical companie say EC rules require the commis sion to automatically impose 13percent tariffs once the level of im-U.S. Money Market Funds ports exceeds the small duty-free quotas granted to Saudi Arabia and other developing countries un-der the Generalized System of Pref-

> Imports of Sandi glycol by EC countries so far this year have totaled about 20,000 metric tons, the taled about 20,000 metric tons, the ECD spokesman said. TOKYO — Japan's current ac-

slightly from the month before, but still remained a hefty \$4,77 billion with exports reaching a monthly record, the Finance Ministry said On the unemployment report.

Separately, the government said that Japan's seasonally adjusted jobless rate in October rose to a one-year high of 2.8 percent, with 1.59 million people out of work. That is a 0.1-percent increase point over September's rate.

The October current account, a broad made measure that includes goods, services and remittances, was the fifth-largest monthly figure. The surplus in September was \$4.88 billion

\$5.27 billion in September, the ministry said. The merchandise trade surplus

reached \$43.59 billion in the first from September. 10 months of this year, and economic analysts said it is certain to top a new high of \$50 billion in Shipments to China, the United

States and the European Commu-nity in October pushed exports to \$15.99 billion, an 8.1-percent in-crease from the year before, the above August.

count surplus in October shrank lion set in December 1984.

Imports rose 2.3 percent from September as Japanese investors the year-before level to \$10.59 bil- actively bought foreign stocks and lion, largely due to such variable bonds, encouraged by buoyant factors as purchases of aircraft and trends in New York. gold for industrial use.

the government's Management and Coordination Agency said in its monthly labor survey that the recent increase in the value of the ven apparently has had an adverse impact on employment in manufacturing industries.
The report, released Friday, said

that there were 14.65 million people employed in manufacturing down 0.3 percent, for the third straight year-to-year monthly drop. The gain from merchandise About 11.94 million people were in trade widened to the third-largest monthly total of \$5.40 billion from million in agriculture and forestry. services, up 2.1 percent, and 4.98 down 1.8 percent.

The total work force was 58.72 million last month, up 100.600

The report also noted that employment slowed down in October in a segment of the export-related manufacturing industries. The agency also said that Japan's

unadjusted consumer price index rose 1.4 percent in October from September, which was I percent

The Value Line brings you HARD FACTS ON 1700 AMERICAN STOCKS

The Value Line Investment Survey covers more than 1700 American stocks, which account for over 90% of all dollar trading volume in U.S. equity markets. With The Value Line Survey, you have objective evaluations—updated every week—of just about any American stock that's likely to Every three months, on a regular schedule, Value Line

presents a new full-page report on each stock, packed with vital data, including 22 series of key operating and financial statistics going back 15 years and estimated 3 to 5 years ahead. Then, for each stock—every single week—Value Line updates the Price, future Performance and Safety ranks, Appreciation Potential, Yield, and estimated Earnings and Dividends. This information will enable you to assess a stock's pros-

pects based on hard financial facts. As a special intro-ductory offer, you can receive 12 weeks of Value Line for only \$75—about half the regular rate—providing you have not had a subscription in the past two years. As a BONUS, you will also receive the Value Line's 2000-page Investors. Reference Service with the latest full-page reports on over 1700 stocks, together with the 72-page booklet, "A Subscriber's Guide." Send payment (no cash please) along with name and address together with this ad to Dept. 513G65

Prices Finish Mixed on NYSE

NEW YORK - Prices on the New York Stock Exchange finished mixed Friday in light trading following Wednesday's record-setting

The Dow Jones industrial average fell 3.56 to 1,472.13. It established a new high at 1,475.69 Wednesday. The market was closed Thursday for the Thanksgiving holiday. For the week, the Dow jumped 7.80 points.

Broader market indicators eased. The New York Stock Exchange index lost 0.13 to 116.55, down from the all-time high it set Wednesday. Standard & Poor's 500-stock index also backed down from its record, easing 0.37 to 202.17. The price of an average share fell four cents.

Advances outnumbered declines by a 8-7 ratio. Volume dwindled to 84.1 million shares from 143.7 million Wednesday.

Hugh Johnson, head of the investment policy committee at First Albany, a regional brokerage, said money managers are beginning to feel that the market has come a long way very fast.

The market needs some economic or mone-

tary event to move it further and so far such an event is noticeably absent," he said. Because current equity prices already anticipate a discount rate reduction, the cut must materialize or we may get a sharp correction," Mr. Johnson

Money managers are beginning to feel edgy. he said. "They're more comfortable doing some selling than they are buying stocks at these new higher levels."

But Greg Smith, research director at Prudenial-Bache Securities, believes he market could

M-1	Rises	<i>\$2.8</i>	Billion

The Associated Press

NEW YORK — The narrowest measure of the U.S. money supply, M-1, rose \$2.8 billion in mid-November, the Federal Reserve Board reported Friday.

The Fed said M-1 rose to a seasonally adjusted \$616.6 billion in the week ended Nov. 18 from a revised \$613.8 billion the previous week. Originally M-1 for the week ended Nov. 11 was eported as \$613.6 billion.

M-1 includes cash in circulation, deposits in checking accounts and nonbank travelers

"Over the past couple months, the stock market has given investors a lot to be thankful for and we believe it will give them more of the same during the December holiday season," Mr. Smith said.

Texaco was the most active NYSE-listed issue, rising 1 to 32½. The stock has fallen about \$7 a share since a Texas jury said last week that Texaco should pay \$10.53 billion to Pennzoil for luring Getty Oil away from a merger with Baxter Travenol followed, adding 1/4 to 151/8.

Public Service Electric & Gas was third, edging up % to 30%. Among blue chips, Chevron dropped 14 to 381%, Sears fell % to 37, General Electric lost 1/8 to 65%. Westinghouse Electric dropped 1/4 to 45½, American Express eased 1/8 to 48%, Allied-Signal rose 1/8 to 46% and General Motors lost 1/8

Dresdner Says Profit Rose 3.3% in 10 Months

By Warren Getler nal Herald Tribane

FRANKFURT — Dresdner Bank AG said Friday that parent bank pretax operating profit rose 3.3 percent in 1985's first 10 months from three-fourths of the full 1984 results.

The earnings seem to assure the group a record operating profit of at least 25 billion Deutsche marks (\$987 million) this year from an estimated 2.1 billion DM in 1984.

Wolfgang Röller, Dresdner's chairman, said the projected record earnings will mean a marked divithend increase for shareholders, but he declined to say how large the boost could be. Dresdner paid 7.50 DM a share on 1984 earnings. Commerzbank AG, the smallest

of West Germany's three largest mercial banks, said earlier this week that expected record group profit this year of 1.5 billion DM would yield higher dividends. But Deutsche Bank AG — the country's largest commercial bank refrained Thursday from any promise of a dividend increase, despite anticipation for banner group profit of close to 4 billion DM. Last year Commerzbank paid 6 DM compared with Deutsche's 12-DM

payout.

Mr. Roller declined to specify group operating profit, which includes earnings from the bank's trading on its own account, for the January-to-October period, Parent Japanese capital.

bank partial operating profit, ex-cluding own-account trading, rose to 684.4 million DM in the first 10 months, compared with 662.6 million DM for 10/12 of the full 1984

West German banks traditionally avoid providing precise year-to-year comparison in interim reports, preferring instead to match current figures against a proportional aver-age for the previous year.

Dresdner's chairman, like his ounterparts at Commerzbank and Deutsche Bank, stressed the role of imparalleled trading earnings as the chief factor behind the bank's overall earning performance this year. Without being specific, Mr. Röller said that earnings from ownaccount trading in securities, pre-cious metals and foreign exchange in the first 10 months exceeded the

full 1984 tracing profits. Seeking to capitalize on robust international securities trading activity, Dresdner Bank is about to conclude an agreement permitting the bank to establish investment banking operations in Tokyo, Mr. Röller said.

Deutsche Bank last week announced plans to begin investment banking in Tokyo next spring through a joint-venture with West German industrial partners. Commerzbank has also said that it is exploring ways to set up direct in-vestment banking activities in the

Saudis' Petrochemical Output Pressu

By Bob Hagerty ternational Herald Tribuni RIYADH — A customs agent at the airport here recently stopped a young Sandi whose baggage con-tained a plastic bag of white pow-

After a tense moment, the young man demonstrated that he was an international salesman for Sandi Basic Industries Corp., or SABIC. which operates the kingdom's new petrochemical industry. His suspi-cious-looking cargo was a sample of powdered polyethylene.

Saudi customs agents presum ably will soon get used to such cargo, but Saudi Arabia's move into petrochemicals is helping to force a much more difficult adjustment on the industry worldwide. Traders in Europe say the buildup of production by the Saudis and other new producers already is con-

tributing to a drop in prices.

The entry of SABIC and other new producers, notably in Canada and Mexico, means that "the West-era chemical industry must go through another period of traumatic restructuring," said Stuart Wamsley, chief chemical analyst at the London stockbrokerage of W. Greenwell & Co. That spells more dosures of inefficient plants, particularly in Europe, where overca-pacity is roughly estimated at 15

The industry can hardly say that it was not warned. Sandi Basic Industries, which is 70-percent owned by the Saudi government, has been working for a decade on building plants to produce petrochemicals

Mitsubishi Corp., Exxon Corp. and the Royal Dutch/Shell Group. With those new plants, most of which began producing in the past year, SABIC has become a major force, accounting for about 5 percent of worldwide capacity for making ethylene, the industry's pri-

mary raw material.

The project is at the heart of Saudi Arabia's drive to reduce dependence on oil, which last year accounted for more than four-fifths of total exports.

While the project is generally regarded as well-conocived, it has come into operation at an awkward time for the industry. After booming in the 1960s and 1970s amid soaring demand for its main producis - such as plastics, synthetic fibers and detergents - the petrochemical industry has settled into sluggish growth. For the "foreseeable furure," Greenwell's Mr. Wamsley forecast that demand would grow just 2 percent to 3

Tuesday: Saudi Arabia seems deuned to maintain a sharply high

Moving 'Downstream': The Perils of Refining

RIYADH - Saudi Arabia has played its ace by ilding plants to produce basic petrochemicals, for which its feedstock costs are far below those of most

Now the Saudis face a difficult challenge in finding ways to move "downstream," into projects that would turn those basic materials into more refined products that are higher in value.

To make downstream projects worthwhile, the country needs to show that it can make more money by further refining than it can by merely exporting base petrochemicals. The big hurdles are Saudi Arabia's high costs for building and maintaining plants, reflecting the harsh desert environment, and for shipping products, reflecting the long distance from major

When all the negative factors are considered, said John A. Philpot, a director of the consulting firm of Chem Systems International Ltd., "it's difficult to find anything that looks strongly attractive."

dustries Corp... or SABIC, which operates the kingdom's base-petrochemical industry, is already moving downstream with plans to produce polyvinyl chloride, which is used in such products as pipes and window frames, and methyl tertiary buryl ether, a gasoline

SABIC's capital-spending plan for the next five years includes 12 billion rivals (\$3.3 billion) for petrochemical, plastic and fertilizer projects. Ibrahim A. Salamah, SABIC's managing director, said in an interview that the company was studying, for instance, the possibility of making alpha-olefins, which go into

detergents and lubricating oil.

Other downstream possibilities include vinyl acetate and acetic acid, both used in paints and other products, as well as phosphate fertilizer to complenent the planned production of ammonia, Mr. Salamah said. SABIC also could move into another base petrochemical, polypropylene, he said, though outsiders such as Mr. Philpot said they saw little advantage

COMPANY NOTES

Akzo NV, the Dutch chemicals group, has announced the purchase of 275,000 ordinary shares, or 3.5 percent of Blundell-Permoglaze Holdings PLC, a paint-making company, at 175 pence (\$2.59) per share. Akzo said it was making an offer for all the issued share capital

Bayerische Hypotheken- und Wecksel Bank AG said parentbank operating earnings, including trading on its own account, rose 7.1 percent in the first 10 months of 1985 from 10/12 of 1984. The bank to increase to 45 percent its stake in also said it expected to pay a "fa-vorable" dividend on 1985 earnings after 10 Deutsche marks (\$3.95) in 1984. It gave no absolute profit

EC Says Output Growth Slowed in 3d Quarter BRUSSELS — Growth in industrial produc-tion in the European Community appears to have slowed in the third quarter of 1985 in contrast to the buoyant growth rates of the first

Pite EC statistics agency, Eurostat, said output in the 10-member EC in the latest quarter had risen 3.3 percent from the third quarter of 1984.

But it said industrial production grew by only 0.8 percent from the second quarter, and that there was no growth at all compared with June. It said even this overall slight rise from figures for the previous three months masked static or negative growth in Britain Italy, the Nether-

A Celebration in Swedish Style

By Errol G. Rampersad

TOCKHOLM - "Christmas in Sweden," an album of festive music by the Swedish tenor Jussi Björling, tells it all in song, from the joyous strains of tradi-tional carols to the robust refrains of merrymaking rides in the Scandinavian snow.

For Swedes, the Christmas season really begins with the Luciafest on Dec. 13, a time for celebrating a festival of lights at the height of winter's darkness. In schools and offices all over the country, the day begins with white-robed maidens, a crown of lighted candles illuminating their heads, serving coffee, saffron buns and pepperkakor, a Scandinavian variety of ginger

snaps.
One of several legends has it that Santa Lucia, a patron saint associated with light, was burned at the stake in Italy. The red ribbon adorning the illuminated crown in today's festivities is said to symbolize the bleeding saint. The Luciafest tradition goes back to Roman Catholic times in Sweden, and its celebration on Dec. 13

marks the approaching turnaround in the winter solstice and the beginning of lighter days. The Christmas celebration itself takes place on Christmas Eve, with the ceremonial jul glog, a warm wine laced with aquavit, a typically Scandinavian clear liquor flavored with caraway

seeds, wherting appetites for a hearty meal. Dinner, a truly family affair sometimes grouping three and four generations, begins in late afternoon with bufisk, a sort of dried cod that is reconstituted and served boiled. This is followed by an unending variety of sillar, marinated herrings, as well as gravadlax, the very Scandinavian salmon dish, washed down with

beer and aquavit to a chorus of repeated skals. The fish course then gives way to the piece de resistance, the Christmas ham, devotedly prepared by the matron of the day and served with a sweetened mustard and thick slices of limpa, an equally sweet-flavored bread. Assorted sausages, patés and Swedish meatballs round off

the main course before dessert. Dessert is the moment of suspense around Christmas tables in Sweden - and not simply because of the irresistible sweet rice porridge that is served. Tradition has it that the lucky recipient of a hidden almond in one of the servings will be wed within a year.

It is at this point that Santa Claus makes his entrance, a member of the family having already agreed days before to play the role of Jultomte. Not unusually, the gifts are a reflection of qualibuys made during the hectic pre-Christmas opping days.

In Sweden, there are excellent buys in furs and jewelry, glassware, ceramics and china, art and handicrafts, as well as woolens and fine

The leading department stores, Ahlens, Nordiska Kompaniet (known as NK) and Pub, are open seven days a week and here one can find everything under one roof. Some clothing boutiques are also open on Sundays in the cent

the city. In addition to crystal from Orrefors, Kosta and Boda, there is a wide selection of pieces from lesser-known glassworks in the Småland district, including plate motifs and artist collections, from tiny presentation pieces to massive crystal sculptures

Most of these can be found at the large department stores, all within triangular walking distance of each other, as well as at specialist shops along Kungsgatan, the main thorough-fare. Notable among these for its huge glass

selection is Nordiska Kristall. Biblioteksgatan, the pedestrian street, houses some of Stockholm's best fashion boutiques and

jewelry stores. Kerstin Adolphson, on Västerlänggatan in Gamla Stan, the old town, is noted for leather bags, hand-embroidered blouses and hand-knitted sweaters, with a wide selection from the

other Nordic countries, Denmark, Norway, Finland and Iceland For furs, notably the Saga variety in mink and fox, the big three department stores offer a wide choice, including imports from other Nordic designers, including Denmark's Birger Chris-

tiansen. For more intimate shopping, there are several boutiques, such as Bagedahls Pälsateije, at Skärholmens Centrum; Sophie Ericson's, at Mäster Samuelsgatan 45, and Amoress, at Nort-

A more colorful line of coats is produced by Trance. Among them are two- and three-tone pieces in beaver lamb, shearing lamb, sheared rabbit and coyote.

Sheepskin coats, for men and women, are available at Olof Nylander, Sveavägen 126. Although the best buys in Stockholm are in mink furs, 90 percent of which come from farm-(Continued on Page 15)

From Paris, Gourmet **Treasures** The Chefs Use

By Katherine Knorr

ARIS - It would take a book as long as "In Remembrance of Things Past" to catalog what can be bought in Paris, at Christmas and at any other time. You can find the best in clothes, jewelry, food, furni-ture, objets d'art — and find them in some of the most elegant stores in the world whether around the Madeleine, on the rue Royale or the rue du Faubourg St. Honore; around the Opera; in historic neighborhoods like the Marais; on the quiet back streets of the 16th arrondissement, or in the great department stores like the Galeries Lafayette, the Printemps and the Samari-

It is twice as exciting in this season, when Paris dresses up for Christmas. The great shopping streets get strung overhead with stars and shimmering mirrored globes that cast moving curtains of light, and the trees are decorated with tiny lamps that make them look like lace.

The department stores do up their windows and their facades, of course, but, in some ways, they cannot compete with the displays of the parisseries and charcuteries: miraculously deco-rated cakes, and the world's most imaginative dishes of foie gras shaped like ducks or like pigs. stuffed coquilles St. Jacques, venison pates, and truffled sausages — everything glittering with gelée — and smoked salmon on ornate cutting platters, with silver tails.

You can find clothes, jewelry, furniture and so on in other great capitals, but what you will find nowhere else —in quality, variety and price — is Paris's treasure trove of cooking equip-ment, and generally of the beautiful and practi-cal objects that make up les arts de la table.

While there are many stores in many neighborhoods that specialize in beautiful table settings, china and crystal, the best place for the real nitty-gritty stuff to turn out a French meal is the Halles quarter — not surprisingly.

Although the central market has left Paris. and despite the lunar architecture that is slowly replacing it, the streets that radiate out from the center still specialize in supplying restaurants, food shops, and individuals, in everything from butcher-block tables and super meat grinders to exquisite chocolate molds.

And while you look at the kitchen-equipment

shops, you will pass food stores that may not be as elegant as Fauchon and Hediard but that sell. both wholesale and to individuals, a bewildering array of dried mushrooms in huge bags, canned truffles and truffle juice, pâtés and preserves of all kinds, and spices.

In the equipment stores, you can find knives for everything from slicing tomatoes to slicing prosciutto to chopping Chinese duck; whish of all sizes and shapes; varied nozzles for decorating with cream or mayonnaise; string cutters for Requefort and other crumbly cheeses: pans for fish; copper pots, pans and basins of all shapes and sizes (careful: the good ones are thick copper with iron handles; pans of thin, skiny copper with brass handles are strictly for show: iron pans and cookers; pans with hole, in the

Toys of Germany: Keeping Adults in Mind By Herb Altschull

UREMBERG — Germany is famous for making ceramics and precision optics, cuckoo clocks and apple strudel, but what gift can the foreign traveler take home-for Christmas that is more Deutsch" than a toy?

German craftsmen have been renowned for centuries for their intricate products made for children and the young at heart. That tradition

One leading toymaker goes back to Goethe's

The Nuremberg museum is a charming place to visit. On a stroll through the three stories of playthings nestled in a 300-year-old building, it is very much alive today. Faust" for a short, clean definition of the idea behind Germany's toy industry. Goethe's Devil, he observes, remarked that "Theory, my friend, is simply dismal." The West German toy industry aims at practical learning that will be of use

Per Toy Market," wrote recently that Mr.
Postnan was right to argue that television destroys imagination by making the whole world

Dostoevski and other 19th-century novelists

10ys, on the other hand, Mr. Glotze said, are secal, "for through toys the child is able to the secret origins of his imagination sponta-toutly, using his own creativity."

tour through the toy museum in Nurem-E offers a panoramic view of the past and of available in stores and snops today:

and toy soldiers, stuffed animals and modernistic and toy soldiers, stuffed animals and modernistic and cost (including a Noah's count dozens of paired animals). fire engines count of the local craftsmen.

German toymakers are just as painstaking today, although their best efforts are no longer toy soldiers. There is, for instance. then everything seems to be in motion.

Similar toys in their modern incarnations can be found in every German city, town and village. There is still plenty of the past, with all the nostalgia of a Steiff teddy bear or a Kaethe-Kruse doll, but the emphasis this year is on the future, on computer-driven robots and spaceage building kits.

A big seller, for example, is Tomy Toys' 40-centimeter-tall (151/1-inch) OmniBOT, a beginner's robot with his own memory banks who talks and beeps. It sells for 80 Deutsche marks (\$31.40).

is easy to forget it is 1985. The museum was started by Lydia Bayer, a

longtime resident of this area of Franconia, from her own collection. The curator, Marion Machine in the display and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes, glassware and furniture in the dolls' houses, all handmade (Many of the items and the marvelous miniature dishes).

Dostoevski and other 19th-century novelists found the German toymakers intriguing characters, fashioning fantastically complex models.
These artisans were descendants of the medieval Nuremberg craftsmen. The museum's curator recalled that Louis XIV ordered from Nuremberg silversmiths a complete army of toy soldiers for Versailles. Russian czars and Hapsburg

CHRISTMAS SHOPPING

Finding Antiques in Barcelona

By Mary Peirson Kennedy

ARCELONA - "To travel across Spain and finally reach Barcelona is like drinking a respectable red wine and finishing up with a bottle of champagne," is how James Michener summed up Barcelona in his book, "Iberia." Barcelona can be many things to many people, but to an antique lover it is an especially exciting place. In the last 10 years, it has become what many experts consider the best place to buy antiques in Europe. With more than 350 dealers, the selection is enormous.

And for the Christmas shopper, Spain has the added advantage of offering a leisurely pace free of the frenzied, pre-December 25th crowds found elsewhere, since Spaniards do not exchange gifts until Jan. 6, or Epiphany, the day the Three Wise Men made their way toward Barcelona? There is no doubt about it, they

have the most superior antiques in Europe these days, the quality is so good and the prices are so much better than anywhere else," said Liny Ruddy, a doll collector from New York, over coffee at the charming, turn-of-the-centurystyle café at the Centro de Anticuarios on Barceiona's elegant Paseo de Gracia. Opened in 1983, this modern confection of

marble, glass and greenery houses 73 antique dealers and is the brainchild of Manuel Ramos. a genial young man who is known by collectors

"Yes," he said modestly, "I have a few dolls."

collector's items from Art Deco and Art Nou- from 9 A.M. to 2 P.M. in the Plaza Nova in front veau to antique jewelry. They offer the services of the great Gothic cathedral of the city, 20 to 25

of a "doll hospital" as well. After stamps, Mrs. Ruddy said, dolls are the largest collector's item in the world.

According to Mr. Ramos, the biggest seller today in antiques is Art Deco and Art Nouveau (turn of the century to the mid-1930s), and Barcelona is full of these items. At the Antique Center (55-57 Paseo de Gracia, Manuel Ramos, tel: 215-9463), almost every dealer has stocked these decorative pieces.

At the shop of Marion Pla (Nos. 70-71, tel: 216-0198) there are Tiffany-style glass vases that are made in Catalonia and sell for around 55,000 pesetas (\$347),

But if curved brass lamps with tulip-shaped shades and mirrors with Salomé draped around them (at L'Aurora, No. 2, tel: 215-8364) are not to your taste, perhaps the delicate filigreed gold earrings in the same shop will be. They start at 13.000 pesetas and go as high as 160,000 pesetas. He also has an Besides these, there are fine silver-service pieces, starting at 13.000 research and inarging ones, and may can be used with American light bulbs. They range from 13,000 to 20,000 pesetas. He also has an attractive selection of Art Deco lamps starting starting at 12,000 pesetas, at Paco Rebés (No. at 14,000 pesetas. 73, tel: 216-0691) or 16th-century and 17thcentury musical instruments.

Sotheby's of London opened up at this center in November, making Barcelona a truly interna-tional center. Since the Catalans have always been collectors of fine things, Barcelona's shops boast not only authentic Spanish pieces, but also china, glass and furniture from all over the

His three shops in the center — booth Nos. 32.

33 and 34 — have not only dolls but all sorts of buy antiques in Barcelona. Every Thursday dealers gather under brown and yellow awnings to display their wares.

bottom for roasting chestnuts; escargot plates, holders and forks; chocolate molds for making fish, eggs. Santa Clauses: a wide variety of dishes and glasses for all purposes; oven-proof earthenware bowls for onion soup; earthenware terrines, with animal-shaped lids; round ladles, oval ladies, wooden and metal ladies; even cast-iron reflector panels for

For your friends who wax nostalgic about French cases, you can buy the real thing in case coffee cups — white with ridges, green with golden edges — wine pitchers, salt-pepper-and-mustard sets, butter molds, even plastic tags with the pictures of sandwiches that decorate all cafe

There are lots of restaurant-supply shops in Les Halles, and you will no doubt discover your own favorites. Here are ours:

Perhaps the most famous is Dehillerin. 18, rue Coquillière, 1er, Tel: 42-36-53-13. There is nothing elegant about this store. It is cramped, dusty, poorly laid out and largely reminiscent of an old quincaillerie, where tiny, specialized utensils are stored in wooden drawers stacked up to the high ceiling. The people who wait on you range from surly to outspokenly unpleasant. But it is a gold mine for heavy-duty equipment, specialized utensils and restaurant/cafe dishware. If they don't have it, they can

La Bovida, 36, rue Montmartre, 1er. Tel; 42-36-09-99 and 42-60-79-51, is another store devoted mostly to basic cooking equipment that also stocks plates, glasses, etc.

A somewhat funcier store that still deals in basic equipment is A. PAIRIS LOCK

Simon, 36, rue Etienne Marcel, 2eme, Tel: 42-33-71-65. They sell a range of dishes and elegant wine

Other big stores in the area specializing in restaurant supplies are Horecol, 32, rue Etienne Marcel, lème, 42-36-15-15; La Corpo, 19, rue Montmartre, 2eme, Tel: 42-33-81-35; and M.O.R.A., 13, rue Monumartre. 1er. Tel: 45-08-19-24.

For beautiful things, one of the loveliest stores in the area is Au Bain Marie, 20, rue Herold, Ier Tel: 42-60-94-55. It sells new and old objects for the table - silverware, fabulous glasses, old charcoal cookers with porcelain tiles, seltzer bottles, tablecloths, cozies and lots of workbooks.

For modern glasses, tableware kitchen things, there is Aux Quatre Saisons, 6, rue du Jour, 1er, Tel: 45-08-56-56, and in the Forum shopping center. It also sells some furniture and linens.

German Toys: Keeping Adults in Mind

(Continued From Page 13) motives and 256 railroad cars in computer-

run systems that permit each car to move

A typical Maerklin train set can be bought for about 180 marks, but special offers are available. In some shops, the power system, locomotive and two coaches are being sold for as little as 98 marks.

Of course, there are plenty of antique models around, too. Germans are so enamored of model trains that Frankfurt is now holding an annual model train fair in November. At this year's fair, 11 German firms had locomotives on exhibit, while 13 showed coaches.

The Nuremberg museum is not the only toy collection in West Germany. Equally popular are the stuffed animals at the Margaret Steiff museum in the Black Forest village of Giengen and the model trains at the Maerklin museum in Göppingen.

All the museums and most of the makers of toys are located in the same gingerbread part of the country - in the foothills of the Alps, the Black Forest, the Bavarian woods and romantic Franconia. This is the land of Snow White and Hansel and Gretel, the teddy bear and, reputedly, the world's first doll that was meant to look like a child.

There are dozens of Steiff teddy bears. ranging from the original cuddly fellow of 1907 to today's fire-resistant, synthetic-fabric models. They come in white, yellow, caramel Steiff makes many other stuffed animals: The original, still the Steiff trademark, is a white elephant. The basic teddy sells from 20 marks but replicas of the original cost up to 1,000 marks. New this year are the blond Teddy Petsy (65 marks to 135 marks) and the white Passport Bear (155 marks).

Then, there is the Kaethe-Kruse doll. This ar's production is sold out, but orders for 1986 are being taken, said the company's owner, Heinrich Adler, the founder's son-inlaw. Kruse, who lived in the Bavarian town of Donauworth, was tired of seeing dolls made of porcelain and celluloid, all looking like miniature adults. So, in 1910, she created for her children a doll of soft felt with the face of

Persuaded that others might like to see her product, she exhibited it at a fair for original design in Berlin. Representatives of F.A.O. Schwartz, the New York toy store, were there, and they ordered 150 of the dolls. Kruse went into production, and today the Donarworth company produces 18,000 a year, all handmade. The cost: between 200 and 600 marks.

Lego, which began producing building kits in Denmark 50 years ago, has the largest turnover in West Germany; Fischer is second. Among the most diversified companies in the country is Ravensburg, situated in another Black Forest town. It makes a third of West Germany's card and dice games, the being the oldest "toy" in the world.

Outside West Germany, Ravenshing is best known for its pignam puzzles. The sinellest of these contain eight pieces, but the line ranges up to a puzzle of 12 000 pieces. This is a replica of Hieronyman Bosch & The Quest of Saint Anthony, and when completed, if anyone can (Ravensburg officials do not know whether the right his eyer been accomplished), it occupies 4 square meters [4.8 square yards). square yards).

In between, Ravensburg puzzles come in many sizes and forest, depicting landscapes, castles, ships, manuals, vandands and celebrated paintings. The standard 1,500-piece puzzle sells for 23 marks. The 12,000-piece puzzle costs 148 marks.

The harried traveler can never go wrong by heading for a shop specializing in food, espe-cially candles. Stolles, a fruit cake assually in the shape of a loaf, is the favorite. Then, there is the well-known Noremberg Lebkuchen (gingerbread) which comes in many shapes, small and large, often including honey, misins or marzipus. It can be stored for months.

For the traveler with already heavily packed someone, there is also a great variety of candles and Chambrids tree or amends, often in other and gold alloys. Complete Nativity scenes of band cared word are on the market. These are Spine products, too, with production or officerable in sorthern linky, but they described the production of the pro

In Switzerland, Crèche Figures and Crystal Sculptures

By Mavis Guinard

ENEVA — Switzerland, with its rich tradition of individual craftsmanship and respect for and functional and decorative handicraft items, gives the Christmas shopper a wide array of gift selections, from handmade glass balls for the Christmas tree to hand-carved wooden toys. At Christmastime, a great deal of care

goes into baking homemade cook- at Gerechtigkeitsgasse 73, Vitrine are many animal puzzles and ies or making presents with one's mixes high-quality objects, old and own hands. The children bring new. There are more Christmashome from school lumpy clay ashtrays, macrame belts and enamel

The one-of-a-kind handcrafted items range from the functional that have been used for centuries to the imaginative creations of young artisans trained to work in wood glass, pottery, textiles or jewelry. City boutiques put the accent on modern designs, the more tradi-tional are displayed in Swiss craft

Between Bern's clocktower and the bear pit, the Heimatwerk, Kramgasse 61, features Christmas crèche figures by Brienz woodcarvers. A lamb is 20 Swiss francs (just under \$10); a shepherd is 86 francs. Since each piece is individually carved, collectors pay much attention to the expressions. There are satiny wooden bowls and ladles, trays and platters. To avoid the tedious wrapping of small gifts, fine woodchip boxes come in all sizes. Some are decorated with nosegays and landscapes.

On nearby shelves, crystal table glass, shaped into cheese plates, goblets, vases or candlesticks, come from Samen or Hergiswil. To decorate the Christmas tree are handmade balls of glass as iridescent as soap bubbles. Small ones cost 5 francs; medium ones, 7.50 francs. The store will mail them within

tree balls, in jumbo size and intriguingly colored, by Rudolf Mojzisek for 25 francs. The stemware is superb - champagne flute

glasses made by Philip Baldwin and Monica Guggisberg. Each is a different color. The price for a rainbow of 16 is 1,200 francs; a single glass is 75 francs. The two glass-blowers met while perfecting their art in Orrefors, Sweden. In their Swiss atclier, they make crystal glasses and sanded glass sculptures.

Above and beyond the extensive selection of "new" buys, there are quality antiques available at Stockholm's two auction houses: Stockholm Auction Galleries, at Jakobsgatan 10, in the Gallerian complex, and Bukowski's, Wahren-

Shops are usually open between 9.30 A.M. and 6 P.M. weekdays and 9.30 A.M. to 2 P.M. on Saturdays. The larger department stores are also open from 10 A.M. to 4 P.M. on

The main shopping streets in Stockholm are Hammgatan, Biblioteksgatan, Kungsgatan and Drottinggatan

In Gamla Stan, the old town, they are Västerlänggatan and Osterlänggatan, Stora Nygatan and Lilla Nygatan. There are a number of large shopping centers located in the suburbs of Farsta, Skärholmen, Vällingby, Täby and Mörby, all reachable by bus or the numelbana subway system.

The main NK store, at the corner of Hamngatan and Regeringsgatan, provides round-the-clock telephone shopping at 762-8800, or 762-8470 during opening hours, English is widely spoken in Sweden. Moreover, many establishments catering to an international clientele have staff members who are fluent in the major European languages.

Most credit cards and travelers' checks are accepted throughout the country. Proof of identity may be required, even for small purchases. Foreign currency and foreign checks are not accepted, although exceptions may sometim be made if these are from other Scandinavian countries.

The shipping office in the major department stores will send packages all over the world. The value-added, or sales,

tax, which amounts to about 15 percent, is deducted when

CHRISTMAS SHOPPING

There are certain regulations governing the refund of the value-added tax on purchases made in Sweden by non-Scandinavians. When you make a purchase, you should get a VAT receipt, which entities you to a cash refund for the amount written on the receipt. When you come to the border, by land or sea, or the internetional airport of departure, you go to the VAT refund counter, easily recognizable by the symbol of a rectangle with yellow and blue

Unlike the case in most other European countries, purchases are sealed and are not to be opened until presentation at the customs counter for the refund. If the purchases are being checked with your luggage, they should be shown at the information desk before checking in for your flight. Failure to do so could deprive you of any refunds, since proof of purchase is based on possession of the merchandise.

A word of advice: If your purchases are many — and particularly fragile — it is better to have them shipped. In this case, the tax refund will offset the shipping and insur-ance costs, not to mention the bassies you save yourself by not being burdened with excess luggage and its rising costs. An unusual bargain gift that can be purchased in Sweden —at Christmas or any other time of the year — is a duty-free Saab or Volvo. The savings, at current prices, easily cover the cost of getting to Sweden to take delivery.

Volvo, which has its tourist and diplomate sales depart-

ment at its plant in Torslanda, outside of Gotenborg, could

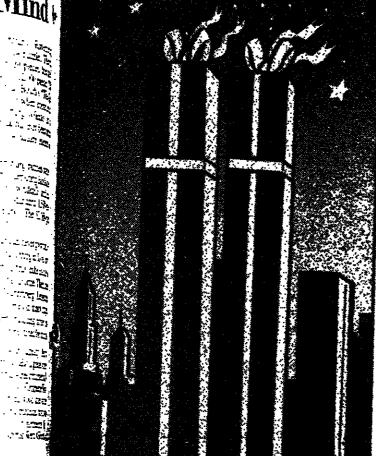

arrange pickup at most large Swedish cities.

Saab has a large outlet in the north of Stockholm, on the way from Arlanda Airport. Both companies have qualified technicians on hand to advise American customers on U.S. DOT and EPA conversions. The Swedish customs plate is valid for one year, and international insurance for that period could also be obtained at the point of purchase

EW YORK - Christmastime on Fifth Avenue invites brisk walking past Lord and Taylor's story-telling windows, with the cold air warmed by the smell of roasted chestnuts and ringing with Salvation Army bells.

Street vendors spread their wares on carpets and freezing music stu-dents play Bach and Handel while pedestrians pause to listen. Masses of evergreens crowd around the statues of saints in Saint Patrick's Cathedral and red poinsettias bank the mall leading to the skating rink at Rockefeller Center.

People wait in line to get into the small store run by the Museum of American Folk Art. and the giant Christmas tree proclaims to all that the holidays have come again to New York City.

Shopping in museums has be-come the thing to do in New York, and these shops have blossomed. What began as racks of posters and postcards has, in most museums, expanded to include everything from reproductions of ancient Egyptian bronzes to a "space pen" that writes on the moon. So successful have these shops become that annexes are opening up in more convenient sites Midtown.

Avoiding crowds becomes a game, and the adept go to museums to do their shopping. The festivities began early this year when an exhi-bition called "India!" opened at the Metropolitan Museum of Art in a burst of gold and silk, followed by related shows all over town. Indian

tiques. The sleek brass-and-smoked glass emporium at the Metropolitan (81st Street and Fifth Avenue) is perhaps the largest museum shop ropolitan has had a small workshop on the premises where artists copy masterpieces from the collections. The museum operates smaller bou-tiques at the Cloisters Uptown, at Macy's Herald Square and at the Midtown Library (40th Street and Fifth Avenue), each with a slightly

different emphasis. Most popular items are copies of an ancient Egyptian cat and a Chinese duck box. The seated and impassive cat is \$19.50 in polymer resin, 5 inches tall (12.8 centimeters), and \$975 in bronze, 1214 inches tail. The 18th-century ivory duck box is reproduced for \$24. Japanese netsuke are \$17.50 to \$21, and a Han Dynasty horse, 5 inches tall, is \$30.

Two young women stood gazing at the sad-faced head of the Virgin from Michelangelo's "Pietà." The copy is priced at \$150.

The Museum of Modern Art (53d Street just west of Fifth Avenue) sells copies of functional obchess set by Josef Hartwig (1923), whose pieces symbolize their movement on the board, for \$120, board extra. A pen designed by Paul Fisher for use in gravity-free space also

The Cooper-Hewitt Museum (2) East 91st Street) will feature an Indian baraar this winter, a tribute to Indian artisans. Also for sale are objects from previous shows: a cloisonne egg. \$75 with stand; umbrellas of batik cloth. \$48; and hand-painted English Battersea

Unusual are black bookeloth photoboxes" by Marco Baldini of Florence, which begin at \$30 for the 7-by-8-inch size holding 30 pages. A wooden jigsaw puzzle of an antique world map is \$50. A assemble, is \$45, and it works. Glass Christmastree ornaments from West Germany are priced from 33 to 97.

So strong is the effect of an Oriental bazaar at the Museum of Natural History that it is a temptation to bargain with the clerks. The finish are \$10.25. These are a pleas-shop, near the 7-th Street entrance ant contrast to the brightly painted just off Central Park West, has gleaming musicians, 12% inches

skirts - from Guatemala, Mexico. are \$40. A gold-tooled leather mag-India, China and Japan, 520 to \$150.

A stuffed tyrannosaurus is \$8. and a triceratops, \$8. A stegosaurus egg of plush zips open for the baby steg to emerge, \$25.

The Brooklyn Museum has its hand-painted English Battersea own subway stop, the Eastern boxes, enamed on copper, 585 to Parkway station, about 35 minutes from Times Square. The Gallery Shop is one of the best museum boutiques in the city, with antiques from all over the world, as well as new things. Recently, a heavy copper plate from Turkey was selling for \$15. At the other end of the wooden Gutenberg press, ready to scale was a pair of seated emperor and empress dolls, at \$900; smaller ones range down to \$139. An early 20th-century Kyodai mirror stand and cosmetic chest costs \$500.

From Mexico, a dull black ceramic bird is \$5; petal-shaped can-dleholders in the same black mat azine cover from Morocco is \$50. \$25.75. Handmade in Brooklyn by Br

Alba Johnson, a quilt is \$75.

pick up a pre-Columbian piece for

But the lust for possessions that has driven us since caravans and The trouble with gifts like these ships first set out for loot is alive is that it is just too hard to give and flourishing in museum shops them away. The time has passed, today.

Getting the Catalogs and Brochures

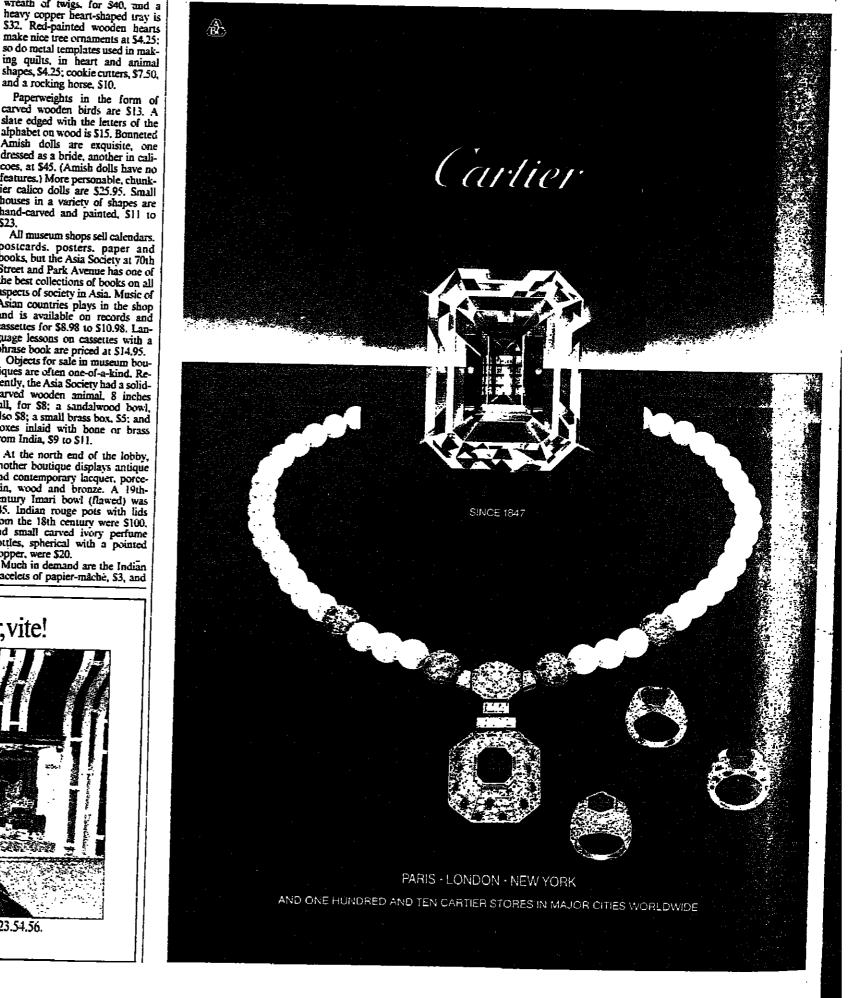

Museum members get sub-stantial discounts, and profit from the shops goes to support museum activities. It is not necessary to pay a museum en-trance fee to visit the boutiques. To order catalogs write to the Metropolitan Museum of Art, 255, Gracie Station, New York, N.Y., 10028 (\$1.00) or to the Museum of Modern Art, Publications, Sales and Service, New York, N.Y., 10019 (\$1.00), A subscription, Christmas 1985 and spring 1986, is \$2.00. Asia

Society's catalog is free: write

to them at 725 Park Avenue. New York, N.Y., 10021, Also free is a brief brochure from the Museum of American Folk Art at 55 West 53d Street, New York, N.Y., 10019, Attention: Mail Order.

The Brooklyn Museum's catalog can be ordered from the museum at 200 Eastern Parkway, Brooklyn, N.Y., 11238. It is also free.

In New York City, call the museums for shop hours, which do not always coincide with museum hours.

Bank With Foreign Partners Opens in Special Chinese Zone

BEIJING — China's first joint-venture bank with foreign partners has opened in the Xiamen special economic zone, the official Xinhua news agency reported Friday.

The Xiamen International Bank opened

Thursday in the special economic zone in the southern province of Fujian, Xinhua said. The bank was established by the Fujian branch of the Fujian Investment & Enterprise Corp., the Xiamen Construction & Development Corp. and the Panin Group Corp. in Hong Kong,

Herald Eribune.

These five men will have a lot to do with how your investments fare in 1986.

Treasury Socretary James A. Baker III, center, and representatives of other major non-Communist industrial countries. They are, from left to right: Gerhard Stoltenberg, Minister of Finance, Germany, Pierre Beregovoy, Minister of Economy & Finance, France, Nigel Lawson, Chancellor of the Exchequer, United Kingdom; and Noboru Takeshita. Minister of Finance, Japan.

When the finance ministers of the five leading industrial nations met in New York in September, they decided on moves to lower the value of the dollar. Their decisions are already reverberating through world markets, provoking a rethinking of investment strategy worldwide.

On December 9, Personal Investing, the International Herald Tribune's monthly report for international investors, will look at the rapidly shifting outlook for 1986 on a market-by-market basis. Can the surge in West German shares be sustained? How will the Tokyo market cope with higher interest rates? Is Wall Street's optimism justified? Drawing on scores of interviews with investment professionals worldwide, Personal Investing will describe the trends, opportunities and risks. Get an early start on your year-end portfolio review with Personal Investing on December 9.

Plants have fed the world and cured its ills since life began. Now we're destroying their principal habitat at the rate of 50 acres every minute.

We live on this planet by courtesy of the earth's green cover. Plants protect fragile soils from erosion, regulate the atmosphere, maintain water supplies for agriculture and prevent formation of deserts. Without plants man could not survive.

Yet, knowing this, we are destroying our own life-support system at such an alarming rate that it has already become a crisis - a crisis for ourselves and an even bigger one for our children.

The figures alone should tell the story - we destroy a tropical rain forest three times the size of Switzerland every year; within 25 years only fragments of the vast Malaysian and Indonesian forests will remain.

What we are destroying

Much of the food, medicines and materials we use every day of our lives is derived from the wild species which grow in the tropics. Yet only a tiny fraction of the world's flowering plants have been studied for possible use. Horrifyingly, some 25,000 of all flowering species are on the verge of

Once the plants go, they are gone forever. Once the forests go only wastelands remain.

Dr. Richard Evans Schultes, director of the

Botanical Museum at Harvard University, has spent 13 years in the Amason jungle collection the 'magic' plants of myth and legend and making them available to Western medicine and science. "The drugs of the future," he says, grow in the primeval jungle."

Who is the villain?

There is no villain - except ignorance and short-sightedness. The desperately poor people who live in the forests have to clear areas for crops and fuel, but they are doing this in such a way that

they are destroying their very livelihood. Add to this the way in which the heart is being ripped out of the forests to meet the demand for tropical timbers and we have a recipe for

What can be done about it? The problem seems so vast that there is a tendency to shrug and say "What can I do?" But there is an answer.

The WWF Plant Conservation Programme The World Conservation Strategy, published in 1980, is a programme for conserving the world's natural resources whilst managing them for human needs. A practical, international plant conservation programme has been pre-pared based on WCS principles and is

now well under way all around the world. You can become part of it The WWF Plant Conservation Programme is a plan for survival which you can help make a reality. Join the World Wildlife Fund now. We need

your voice and your financial support Get in touch with your local WWF office for membership details, or send your contribution direct to the World Wildlife Fund at: WWF International Membership Secretary, World Conservation Centre, 1196 Gland, Switzerland.

Save the plants that save us.

WWF FOR WORLD CONSERVATION

By Bob Hagerty

OON - When William took early retirement last vice chairman of Owensinc, he had visions of purersonal investments, small ventures and tennis balls. infiftly discovered that, after with the big U.S. packag-glassware company, "it's meh fun out of the saddle

hink it's going to be." age 57, Mr. Spengler start-career in October as depuman of Distillers Co., the biggest producer of Scotch He sold his home in Toleo, and moved to England, e fondly remembered from us posting the quiet village the pint of beer at the local

Saturday afternoon.

pengler's new saddle could shippery, however, Argyll PLC, a grocery-store opera-iled by James Gulliver, is expected to make a hostile r bid for Distillers, owner potent brands as Johnnie and Dewar's Scotch and i's gin. After Mr. Gulliver an ambiguous statement is intentions on Sept. 2, the n Takeovers and Mergers that Argyll could not bid for three months. As of Mon-

With the help of a young team of marketing men, the new deputy chairman is taking what he called "a very hard look at all of our brands" in more than 140 national markets. The idea is to find out which have big growth potential and should be favored with greater promotion. Those with less potential, in turn, might receive either reduced promotion or none at all.

"We'll milk them," Mr. Spengler explained. The extra profits squeezed out of marginal brands would go toward building up those

Mr. Spengler also plans to study the company's small food business, which mostly is engaged in making and distributing yeast and other baking supplies. Acknowledging that most of the food units have not been very profitable, he promised: "We'll fix them or get rid of them."

Another task facing Mr. Speng-ler is the search for acquisitions. "We need some diversification over time - not quickly," he said.

In that search, Distillers will focus on areas "very closely allied" with its existing businesses, Mr. Spengler said, adding: "Those companies that have become conglomerates wish to hell they could go back to what they understand."

Brazil Reported Selling Shares In State Oil Firm

RIO DE JANEIRO - The Brazilian government was put-ting five billion shares in the national oil company Petrobras up for sale Friday at an estimated value of \$230 million, bro-

kerage sources said.

The nonvoting preferential shares, currently owned by the National Economic and Social Development Bank, represent 6.6 percent of the company's issued capital. About 18 percent of Petrobras stock is pres-

ently in public hands. President José Sarney had said on Thursday that the government would move to reduce its government by selling stateowned enterprises into private hands. He said the program would begin with Petrobras. The brokerage sources said the five billion Petrobras shares

would be offered at 760 cruzeiros (8.4 cents) each, 40 percent of which must be paid immediately with the remainder to be paid in installments on Feb. 24 and March 24, 1986.

The sources said the offering price and payment terms would correspond to a cash price of 10 cruzeiros per share, below Friday's market price of 750.

As a result of the sale, the development bank's holding in Petrobrás will fall to 12 billion shares from 17 billion.

Dollar Falls Against Deutsche Mark

NEW YORK - The dollar fell further Friday against a surging Deutsche mark in European and New York trading, but firmed against the Japanese yen.

The dollar was at 2.514 DM in late New York trading, down more than three plennigs from 2.545 Wednesday. New York foreign exchange markets were closed Thursday for the Thanksgiving boliday. and trading Friday was quiet.

In Frankfurt, the U.S. currency was fixed at 2.512 DM, well below its late figure of 2.5318 on Thursday. The dollar fell more than five pfennigs this week in Frankfurt, from 2.564 DM late Monday.

The dollar traded at 202.3 yen in New York, up from 201 on

Wednesday. In Tokyo, the dollar rose to 201.4 yen Friday at the close ural banks will keep intervening to from 201.05.

"There is the feeling that the yen has stabilized at 200 and the mark trade balance." now the star performer," said Earl Johnson of Harris Bank in

He said there was psychological support for the dollar at 2.5 DM, "but you could see a serious chal-

lenge to 2.5 next week."

One U.S. bank dealer said the market was "wholeheartedly negative about the dollar and needs an alternative. The yen no longer provides that, people are not sure about the pound, so the mark has come to the fore."

A London dealer said the weak ness of the dollar remained based on "a market belief that U.S. inter-

keep the dollar down and push it even lower to improve the U.S.

Gary Dorsch, a senior money market analyst for G.H. Miller & Co. in Chicago, said many traders expected economic statistics to be released next week in the United

States to be "subpar." The pound was at \$1.49 in New ork, up from \$1,47 Wednesday. London, the pound closed at

\$1.4900, up on \$1.478 Thursday. The dollar stood at 2.08 Swiss francs late in New York, down from 2.0935 Wednesday, In Zurich. the U.S. currency slipped to 2.078 Swiss francs at the close, down from 2.0895 on Thursday. (Reu ters, UPI, AP)

THE EUROMARKETS

Market Firms as Interest Shifts From Dollars

By David Ress

Reuters
LONDON — Eurobonds ended slightly firmer Friday as borrowers' attention shifted away from dollar-

denominated sectors, dealers said. No new dollar-denominated bonds were launched as the U.S. currency closed at a 2½-year low against the Deutsche mark, but the firmness in the mark sparked the launch of some 420 million DM of

new bonds.
Dollar straights generally were little affected by the currency's weakness Friday and prices closed

However, some syndicate man-

agers said the currency was a factor in turning borrowers' attention to the mark, yen and European-currency-unit sectors. Friday's mark issues for AMCA

Overseas Finance Corp., Société Luxembourgeoise de Centrales Nucleaires and Daikyo Kanko Co., brought the week's new-issue volume to 920 million DM, while 262.5 million ECU in new bonds were launched over the week.

PEANUTS

46 Marbie or type

BOOKS

- but her account of what the press made of them at the time contains a good deal of rewarding new material. She has some particularly pertinent things to say about the difficulties put in the way of German-based correspondents by the Nazi authori-ties, and sometimes by their editors or proprietors.

In general the men and women on the spot come out of the story much better than the editorialists and columnists back home. There were blind spots and follies (the fashion editor of the Los Angeles Times, in Berlin for the 1936 Olympic Games, cooed enthusiastically that "Zeus, in his golden days, never witnessed a show as grand as this"), but most of

the basic facts got reported. How they were interpreted is another matter. Their implications were repeatedly played down, and even more regularly flattened out; there was a persistent tendency to account for what was going on in comfortingly "rational" terms. Hitler was trying to divert attention from economic difficulties; he was a moderate not fully in control of the extremist èlements among his followers: German anti-Semitism was essentially a reflection of German bitterness over the Versailles treaty.

Since every effect must have a cause, there was

Solution to Last Week's Puzzle

also no shortage of suggestions that the Jews had brought their troubles on themselves. Walter Lippmann, in a particularly contemptible piece written in May 1933, urged his readers not to assume that, because uncivilized things were being done in Germany, it could no longer speak as a civilized power. To do so would be as unreasonable, he argued, as judging the Catholic Church by the Spanish Inquisition, or Protestants by the Ku Klux Klan, "or the Jews by their parvenus.

Lipstadt argues that there was a matter-of-factness in most newspaper discussion in the 1930s that blunted the edge of what could have been a far stronger popular response, and did nothing to prepare the public for the lethal potentialities of the Nuremberg Laws. The ground had been prepared, in fact, for the much more grievous failure of the press during the Holocaust itself. Lipstadt points out how strange it is that there should still be so much debate as to when the outside world became aware that the Nazis had graduated from persecu-tion to genocide. There were official Allied pronouncements during the war confirming that a program of systematic extermination was under way. and despite Nazi attempts to disguise what they were doing the essential features of the Final Solu-

tion had become clear long before the war ended.

In order to understand why this information had so little impact, the critical question, as Lipstadt says, is "not when news was available but how it was made available." Her analysis leaves no doubt that with very few exceptions - the Buffalo Courier-

Express deserves a passing cheer — it was made available in an utterly feeble and often almost perfunctory fashion. Even the most horrifying news was tucked away on inside pages.

In December 1942, when the Chicago Tribume covered a major report from the Inter-Allied Information Committee in which Nazi-occupied Poland was described as "one vast center for murdering Jews," the paper put the story on page 18 next to a marriage announcement. The previous mouth The New York Times had run a story about a statement from a member of the Polish National Council that a million Polish Jews had been killed. It appeared on page 16, next to a report on the hijacking of a truckload of coffee in New Jersey. Such eerie editorial decisions were the norm, and there was relatively little improvement until the end of the war. ly little improvement until the end of the war.

Jets Get Chewed Up in Lions' Den; Cowboys Do a Trick on Cardinals

New York Times Service PONTIAC, Michigan — It was not the dome, the short work week or the noise of the crowd. It was none of the above, the New York Jets agreed in the wake

So what was it? "We stunk it up today," said Joe

good, either, losing 6 of their 7 games played on the road. But all verdome this season — including the Miami Dolphins, the Dallas

of Thursday's 31-20 defeat by the Ken O'Brien, the Jets' quarterback, was sacked seven times, two causing fumbles that positioned the Lions to score. Another sack put the Lions close enough to get a touchdown on the next series.

Texas A&M Cottons to Texas

Detroit Lions

COLLEGE STATION, Texas -Texas A & M's quarterback, Kevin Murray, threw three touchdown passes Thursday night and the freshman Rod Harris caught one of his two during a 21-point third quarter that beat the Texas Longhorns, 42-10, and put the Aggies

Cup Race Postponed, Not Enough Snow

United Press In SESTRIERE, Italy - The World Cup women's season-opening downhill ski race Dec. at Puy Saint Vincent, France, tes been postponed because there is not enough snow, offi-cials announced Friday.

They said the race will be inled for Villars, Switzerand, on Dec. 14-15; for Haus, Austria, on Dec. 20-21 or for ladgastein, Austria, on Jan 11-2. Villars is the most unlikely ite, since little snow has faller n eastern Switzerland, either. Sunday's men's slalom was moved Wednesday from Courmayuer, Italy, to Sestriere.

into the Cotton Bowl for the first time since 1968.

The Aggies will meet Anburn in that New Year's Day game. The Longhorns are headed for the Bluebonnet Bowl to play Air Force. The Aggies stopped Texas four times inside their four-yard line in the first quarter and were thwarted themselves in the first half by inter-ceptions and fumbles. But they eld on for a 7-0 halftime lead on Murray's 10-yard touchdown pass to the flanker Jeff Nelson.

Then they broke open the game taking the second half kickoff 78 yards in 12 plays, the last a nineyard touchdown pass to Harris.

The Aggies were in the end zone again 36 seconds later, the cornerback James Flowers intercepting a pass by the Texas quarterback, Bret Stafford, and returning it eight yards to the Longhorns' 27.

The next play, the running back Roger Vick gained 16 yards. Then he scored on an 11-yard run for a "Stopping them on the goal line

was the turning point in the game," said the Aggies' coach, Jackie Sherrill. "When you go for it and don't make it, it takes something out of

games played on the road. But all league's top-ranked passer, far six teams who have visited the Silverdome this season — including Hipple. But this time Hipple was the more resourceful quarterback, Cowboys, the San Francisco 49ers avoiding pressure with quick and, now, the Jets — have lost. downs, three times to Leonard

> O'Brien did complete 16 of his 19 passes in the second half, but by then the Lions were lying back af-ter taking a 24-3 lead in the third quarter. O'Brien, who was only 7 of l6 in the first half, wound up with a 23-35 game, including two touch-downs and 281 yards. He was not intercepted, but only because the Lions' defenders had slippery

Much of the pressure on O'Brien was caused because his offensive line could not handle the defenders, especially William Gay, who sometimes lines up as a left end and sometimes as a right end. Twice, said Gay, he got past the right tack-le, Marvin Powell, to sack O'Brien and once Gay swept past Reggie McElroy at left tackle.

On defense, there was the continnation of the epidemic of injuries to the Jets' secondary, with both cor-nerbacks, Johnny Lynn and Bobby Jackson, incurring hamstring problems. Their replacements, Davlin Mullen and Kerry Glenn, strug-

But the defense's problems began with the offense. The Lions, cutering the game as the National Conference's worst team in yards gained, were able to score readily because they had help. In taking a 17-3 first-half lead, the Lions neve had to travel more than 43 yards for any of their scores.

The Jets' opening drive was aborted when O'Brien was sacked by Gay, fumbled, and lost the ball on the Jets' 37 to Steve Baack. Late in the first quarter, O'Brien

Stump Mitchell went over the Cowboys to score, but by game's end the Cardinals were on the bottom, 35-17.

lost nine yards on a sack by Gay that pushed the Jets back to their 14. Dave Jennings punted only 34 yards, so early in the second period Hipple led a short drive that was completed with a 25-yard scoring pass to Thompson.

Pat Leahy's 29-yard field goal made it 10-3, but the next time the Jets got the ball, O'Brien was hit by Curtis Green, fumbled and Gay recovered on the Jets' 43. Two plays later, Hipple completed a 38yard touchdown pass to Mark Nichols.

This was how bad it became for the Jets: On a third-quarter drive, the Lions fumbled twice. They recovered each time. The Jets committed two penalties. The drive ended with Hipple's eight-yard pass to Thompson and a 24-3 lead. The Jets could not recover.

■ Cowboys Beat Cardinals Danny White, the quarterback of the Dallas Cowboys, threw four touchdown passes Thursday, two

to wide receiver Tony Hill, in help-

ing defeat the St. Louis Cardinals, 35-17, The Associated Press reported from Irving, Texas.

The Cowboys, who lost to the Cardinals, 21-10, on Nov. 4, also used a pass by Hill on a trick play to clinch a NFL-record 20th consecutive winning season. White's fourth scoring pass was a

53-yarder to Hill in the third peri-On Dallas' next posse Hill, off a reverse, threw a pass for only the second time in his career. It went to tight end Doug Cosbie for 42 yards and set up Tony Dorsett's three-yard scoring run.

White threw three touchdown passes in the first half, of 18 yards to Mike Renfro, 19 yards to Cosbie and 16 yards to Hill. Hill's catch. with 1:08 left before intermission. gave Dallas a 21-17 lead.

"I was really worried at first," said the Cowboys' coach, Tom Landry. "The Cardinals looked really good. Then they kind of sagged in the second half. That happens to a team that's not in the

McEnroe Wins Match, Loses Footing, Temper, Fine Money

MELBOURNE - After slipping and sliding Friday to a second-round victory in the Austra-lian Open, John McEnroe inleashed a stinging attack on the courts where the tennis tournament

McEnroe beat Danie Visser of South Africa, 6-4, 6-3, 3-6, 6-3, but during the 2 hour and 23 minute match McEnroe had a running argument with officials and was given a code violation for an audible

He later said the court on the left side of the main arena was "without a doubt the worst grass court"

on which he had ever played. The left-handed Visser made the left-handed McEnroe continually stretch to reach shots and the tournament's second-seeded player grew increasingly angry as he kept

losing his footing. "The court is simply not good enough to play a Grand Slam tournament on," said McEnroe.

During the third set, he asked the

tournament referee. Peter Belinger, if the match could be moved to the court on the right side of the main arena, which had been used for the first four days. Bellenger listened to McEnroe's

appeal, but said he thought the court on which they were playing was in good condition. "Listen, if that court is in good condition you've got hair on your

head," McEnroe yelled at the fast balding Bellenger. Afterward, McEnroe was fined \$1,250 and suspended for a minimum of 21 days for use of an audible obscenity. He will not be able to play again, after the Open, until the Nabisco Grand Masters Grand

Sunday in beating Minnesota, 30-20, to break a sixgame losing streak. But the way they did it, with Earl mpbell running for 160 yards, was hardly surprising. The Vikings usually give up a lot of yards on the

ground. The Rams do not. (Rams by 5.)

Minnesota (5-7) at Philadelphia (6-6): Six losses are all the Eagles can afford and still hope to make the playoffs. They beat two bad teams, Atlanta and St. Louis, before losing to Dallas last Sunday. The Vikings' last three losses have been to bad teams. (Eagles

Tampa Bay (2-10) at Green Bay (5-7): The Buccaneers have not won in Green Bay since 1981, and this is the first time they will be playing in truly cold weather this season. (Packers by 6½.)

AMERICAN CONFERENCE Buffalo (2-10) at San Diego (5-7): The Chargers have lost their last two, by 6 points in overtime to the Broncos and by 2 to the Oilers on a field goal with two seconds left. They have also given up 101 points in their last three games, but the Bills have not scored more than 21 in a game all season. (Chargers by 91/2.)

Houston (5-7) at Cincinnati (5-7): Given the tight race in the AFC Central, neither team is out of contention for the division title. If Boomer Esiason's hip and Cris Collinsworth's back are improved enough m play, the Bengals : they have not scored a touchdown in their last two games, losing to the Raiders, 13-6, and the Browns, 24-6. But in their previous matchup, the Oilers won, 44-27. Since, Oliver Luck has replaced an injured Warren Moon at quarterback — and he threw for 286 yards against San Diego. (Bengals by 7.)

Kansas City (4-8) at Seattle (6-6): The Seahawks did not exactly instill confidence in anyone in the way they lost, 19-6, to the 49ers Monday night after getting the ball four extra times on three interceptions and a fumble recovery. But the Chiefs have just ended a seven-game losing streak with a 20-7 victory over the Colts. (Seahawks by 7½.)

New England (8-4) at Indianapolis (3-9): After los-

ing in overtime to the Jets, the Patriots must win this game to tie the Jets in the standing. But it will not be as easy as it might have been had the Patriots not lost three valuable members of the offense. Steve Grogan. who quarterbacked them to six straight victories, is out for the season with a fractured leg and torn ligaments; John Hannah, the right guard, ruptured a tendon in his right shoulder and Ron Wooten, the left guard, sprained ligaments in his right knee. (Patriots by 61/2)

Terry West: "It's a problem getting horses to ride."

Head of Roma Team Denies Intent to Bribe

Agence France-Presse

ROME — Dino Viola, chairman of the soccer team

AS Roma, denied Friday that he had paid 100 million
lira (about \$60,000) with the intention of bribing the referee of a European Champions' Cup semifinal match against the Scottish team Dundee United in Aprīl 1984.

Rome's public prosecutor, Marco Boschi, announced that he has begun inquiries into the Viola said he "discussed these claims in a brief talk

with Federico Sordillo," president of the Italian Foot-ball Association, "in May 1984, but at the time all attention was focused on the cup final against Liver-The referee, Michel Vautrot of France, "is one of

promised to send him a video of the match. Perhaps that's why he has been accused." Viola maintained that he became involved in an attempt to expose a "big name" in football and, when he realized he would be unable to, informed the

football association. "It is not true," Sordillo said. "He only told me of it, in a confused and roundabout way, in September this year." He said Vautrot was above suspicion. Spartaco Landini, accused of acting as an interme-diary for Viola, resigned Thursday as general manager of the second division club Genoa. He reportedly has

Upheaval in Twain Town

The Associated Press
The Associated Press
The Associated Press
ANNIBAL Missouri — The seven-month festival celebrating the 150th anniversary of Mark Twain's birth may have given figuribal a big boost as a tourist attraction but it left the city's govenent in a shambles.

With the celebration in its final numiry of 19,000 people is without a mayor and three of its 12 city councilmen. victims of a bitter squabble caused at least in part by the lesuval.

The sesquicentennial celebration has done remarkably well under adverse conditions," former Mayor John Lyng, a member of the festival commission, said in a recent interview. "Out of a budget that eventually reached \$850,000, we are only about \$20,000 to \$25,000 short and we should make that up with collections, sales of inventory and pledges by the end of the month?

Even before the event opened last spring it ran into problems. A \$1.5 million budget was proposed, but that was trimmed to \$560,000. Organizers had envisioned a long series of concerts by top groups, permanent additions to the historic downtown district and even an in-

ternational balloon race. An amphitheater was built on the southern edge of the town's waterfront, but a theme stage planned for the northern part didn't materialize. The balloon race also failed to come off and some of the musical events were canceled. Meantime, Lyng was defeated as he sought re-election. Most attri-

bute the loss to anti-festival senti-However, Lyng's successor, Richard Cerretti, resigned Nov. 12 after being threatened with impeachment. Three councilmen accused him of misusing city equip-

ment and labor, and illegally taping telephone conversations. The three councilmen, Wayne Pafford, John Hamilton and James Dexheimer, also resigned. All four men said they would seek re-election in a special election in Febru-

Twain — Samuel Langhorne Clemens — was born on Nov. 30, 1835 in nearby Florida, Missouri, but grew up in Hannibal, which was the setting for "The Adventures of Tom Sawyer" and "The

Adventures of Huckleberry Finn," whose publication 100 years ago was recalled on some souvenir Tshirts.

Cerretti had made the festival an issue in his mayoral campaign, saying there were better ways to spend city funds for economic develop-ment, "I wasn't critical of the festi-val itself," Cerretti said Wednesday. "I was critical of the planners. We spent huge sums of money and got nothing for it."

Although none of the impeachment charges against Cerretti in-volved the festival his criticism of the festival had provoked resentment within the council. The council voted last month to suspend the mayor with pay pending an im-peachment hearing, which was canceled after the resignations were

Local feelings were not soothed, either, by an article in the Wall Street Journal on Aug. 6; which city officials said "did a hatchet job" on the town and the festival by listing all of its negative aspects.

"The reporter found and quoted lots of critics of the sesquicentennial, but apparently wasn't as zealous in his pursuit of the other side of the story," wrote Gil Stuenkel, managing editor of the Hannibal

Through it all, however, the festival drew several hundred thousand visitors over the summer and nearly paid for itself. "We'll know after Nov. 30," the official closing, said the Reverend Peter C. Hauser, who quit the sesquicentennial commission in the spring because "there were waves threatening to sink the ship." He has changed his mind. however. "I believe a sizable portion of the community now recog-nizes that it was a worthwhile event. They didn't think it could be pulled off, but it was,"

"Maybe some of the dreams were too large," said Tom Boland, president of the Chamber of Commerce. Lyng added: "It's just too bad that the political laundry was hung out to dry just as we were calling national attention to ourselves.

Twain would have loved it. "When politics enter into municipal government," he once wrote, "nothing resulting therefrom in the way of crimes and infamies is then incredible. It actually enables us to accept and believe the impossible."

CALIFORNIA

Throughout the day the red-clad followers of Bhagwan Shree Rajneesh bring their luggage to a curb here, where it sits in the gently spiraling snowfall, as they wait for the bus that takes them out. Their guru has gone to India after a plea bargain on a federal indict-ment for immigration fraud.

There is an uneasiness among some followers as they face a new life. "I've lived here these years where I was provided for," said Swami Sagar Chetcan, who was running the cash register at the delicatessen. "My clothes were clean. I had clean sheets. I was fed. I had a doctor when I was ill and a dentist when I had a toothache. Now I'm about to go out in the world again, that success-oriented place, and it worries me. 1 don't even have clothes to wear to be interviewed for a job, except these. What would I say, that I've

been a member of a cult?" Declining to give his pre-commune name, as did all others interviewed, he was wearing the red colors of the commune members. as well as the mala, a medallion with a picture of the guru, around his neck on a string of wooden

It is a time of embraces, of goodbyes, of promises to remain n contact, of shared memories.

Waiting at the bus stop where they had put down their luggage, Putorna, a former Eastern Airines cabin attendant, and Shiva Nanda, a former structural engineer in Copenhagen, both said they had joined the guru in Poona. India.

Putorna said she was jaded with travel around the world on her airline passes and had agreed to go with a friend, a New York stockbroker, to India, where they looked up the guru. "At that time Bhagwan was in silence, I sat and looked at him and it came to me that there was more in life."

She came back to the United States and then returned to Poona to live. In 1983 she rejoined the group here. She drove a taxi around the commune.

In four years the cult built a small city in this isolated valley that had been carved by two small streams. The Rajneeshees

Mitchell in an interview. "Now he has left two groups of followers in the lurch when the going got tough."

The commune rode roughshod over the residents of Antelope when they criticized it in 1982. Rajneeshees moved into Antelope, voted and took over the city government, renaming the place Rajneesh. At the Bhagwan's suggestion, in the Nov. 5 election they voted to rename it Antelope. Life at Rajneeshpuram began to fall apart in mid-September

when Ma Anand Sheela, the guru's chief aide, left with some of her staff. others that Sheela, who is also known as Sheela Patel Silverman.

had done many bad things, such as plotting murder, tapping telephones and grabbing power. From Europe she retorted that the commune's troubles stemmed from the guru's demand for more and more jewelry, more Rolls-Royce cars for his fleet, which numbers about 85, and other wasteful luxuries.

On Oct. 23 a federal grand jury in Portland indicted Rajneesh and others on charges that they plotted sham marriages to bring his followers of foreign citizen-ship into the United States from his prior commune in Poona.

Officials say they believe Rajneesh learned of his indictment and fled Rajneeshpuram in a jet. He was arrested in Charlotte. North Carolina, and returned to Portland to face charges.

On Oct. 28, Sheela and others were arrested in West Germany on charges made in a Wasco County, Oregon, grand jury indictment that they tried to murder Rajneesh's physician in a struggle for power in the com-

On Nov. 14, Rajneesh pleaded guilty to two counts of the indictand was ordered to leave the United States. He left that day, saying he hoped never to return, and is reported to be in India.

Rajneesh's followers here were told last week by Dyan John, finance officer for the commune. that the commune had current

when he came to the United debts to purveyors of about \$1.5 million and a long-term debt of \$35 million, mostly to a web of Rajneeshee corporation

[Followers of the Bhagwan Shree Rajneesh have received an invitation from the Indian guru to join a commune in Poona, but those remaining at the central Oregon settlement showed little enthusiam Thursday about the offer, United Press International reported. Eighty-two of the gu-ru's Rolls-Royce automobiles were sold to a Texas dealer. Rajneeshee officials said furnishings and equipment of the commune will be sold at an auction begin-

ning Dec. 17.] So the guru's followers have begun to melt away. Theirs numbers have dwindled to fewer than 1,000, and that is quickly diminishine

not ready to leave met to talk over the past. On a bench outside the delicatessen a woman in late middle age talked of her experience at the commune. "Life is its own meaning," she said.

She had lived in Bellevue, a Seattle suburb, and conducted therapy sessions at a humanistic center, she said, giving her name as Dysan.

She heard things that attracted her to Poona. There she met the gurn and decided, "I wanted to be with this man because he triggered a sense of well-being."

She sold her home and moved to Poona. Then she followed the guru to Oregon. Now she will go back to the Seattle area to live with relatives Ma Prem Manon, a woman in

her early 30s, was on duty at the main gate. She said she would go back to Palo Alto, California, to visit her family, and then on to Santa Fe New Mexico, where she was a waitress and masseuse. "If I had done the sex stuff, I would have made a lot more money, she said, "but I was too shy then and now I'm too scared of disment. He paid a \$400,000 fine case. I just missed out all the way around.

On the road out, up the hill above Curdijeff Dam and Krishnamurti Lake, which is dedicated to the guru, the exodus passed an attractive billboard on which was printed: "I go to the feet of the awakened one.

A judge's ruling on goods sal-vaged from the sunken liner Lusita-desk all day." He says he wants to nia in 1982 cleared the way Friday put his jeans back on and get back

Mayor Edward Koch wants to

dim the Big Apple's lights next month to give New Yorkers a belter view of Halley's comet. The mayor proposed that some of the city's lights be turned off on certain nights at certain locations between Dec. 1 and Jan. 15 to make the celestial light show more visible. The mayor asked his Commission for Science and Technology to recommend steps the city could take to dim lights and improve the view of the passing comet. Koch said he told the commission he could not order all the city's lights distance in because it would make it more difficult to control crime. However, I have asked them if there are some relatively small controllable places in this city — one of our beaches for example — where we can add the extra cops to control crime and where we can dim all city-con-trolled lights in that area so that

Gilliam's critically acclaimed "Brazil" from Universal Pictures, which has not been released in the United States, reached an impasse Wednesday when Sidney J. Sheinberg, president of MCA Inc., where him a letter naming terms that 3 / chan says rule out any chance of his selling the film elsewhere. Milchas says it also dashes any hope that the film will be released in Lo-Angeles by year's end in order qualify for 1985 Academy Award

A municipal inspector checki Vienna hotels' compliance with prevention rules set fire to a h. room Friday, police and fire of beth Wimberger, the hotel owner flame shot up but seemed to ha been quickly put out. Minutes
